

the retiring Chief of Honor, Mrs. Effie Giandoni. Mrs. McGinn is the new Chief of Honor and Mrs. Harris is district deputy.

Work has been for a time suspended on the Baltic owing to some unexpected complications. As soon as these are straitened out something more will be doing.

Percy McMahon superintendent of the Butte Lode Mining Company has gone north it is reported to the new diggings in Nevada.

## Incendiary Fires.

Several attempts have been made recently to ignite buildings in Randsburg. From the nature of these fires there can be little doubt of their origin. From what the people of Randsburg have suffered from fires in the past it would be powerfully uncomfortable for the one found at such work. Our people are very much worked up, as it seems intirely beyond belief that any man or woman, would have such a cowardly, criminal heart as to set such fires.

### RECEIVES FIRST PAYMENT.

Thomas McCarthy has gone to San Francisco in response to a summons from the parties who have negotiated for the tungsten property to receive the first payment. It is reported that the price is \$114,000 and includes all the tungsten claims in the immediate vicinity of the Papoose mine.

Before the parties would conclude the deal they required McCarthy, or some one else, to secure options on all adjoining claims, which he did, and then the deal went through. The parties have until July to investigate and develop at which time the entire payment is to be made. This is a good thing for the boys interested. There are several of them and this sale will make them all independent. It is still a queer thing to think about that tungsten should be developed here, in a purer state and bet-

# Local Notes

## Fire at Old Wells.

Last week the pump house at the Old Wells of the Yellow Aster Co., caught fire, presumably by sparks from the engine, and burned down. The building was destroyed but the machinery and tank was not damaged to any great extent. It is said the fire was discovered in time but could not be controlled owing to the fact that pressure enough could not be obtained to throw water to the top of the building.

## Manhattan Camp.

### Joys of Booming Town.

One day a mountain valley with twenty inhabitants; in a week, a pulsating mining camp of 4000 people. That is the history of Manhattan, eighty miles northeast of Goldfield. A low estimate places the exodus to the new fields from Goldfield alone at 2000 persons. Two hundred dollars a day has been bid for automobiles by those anxious to reach the camp in a hurry. Hundreds of teams line the two roads to the latest camp.

Saturday the crowded stage tipped over and killed the driver, slightly wounding other passengers.

Life at the new camp is strenuous. There is no law or order. Lots have jumped in price from \$25 to \$3500. Meals are very high. A bath in a round tin tub sold the other day for \$3.

Saloons are making hundreds of dollars a day, and at night space is sold on the floors for sleeping room.—L. A. Times.

## Joint Installation

ter-defined ledges, that elsewhere in the United States.

### GOOD ADVICE.

There is so much bad in the best of us,  
And so much good in the worst of us,  
That it hardly behooves any of us  
To talk about the rest of us.

The person who removed handle from phonograph during the reception at A. O. U. W. Hall on Tuesday evening, Jan. 9th will please return same to Mrs. H. J. Giandoni.

H. J. Baron, editorial representative of the Mining Reporter, Denver Colorado, was a caller at the Miner Office today.

C. A. Burcham, vice president, of the Yellow Aster Mines came in yesterday evening after an absence of ten days in Los Angeles and San Bernardino.

J. Beck and Chas. Menneey of San Pedro are here looking for mining property.

Mr. Farnsworth, an insurance agent of San Francisco is a guest at the Houser Hotel.

FOUND: Pair of gold spectacles, owner can have same by calling at Miner Office and proving claim.

### SHIPMENT OF TUNGSTEN.

The DeGolia, Atkins Co. who recently purchased the tungsten properties belonging to the McCarthy Taylor Co., will ship a car-load of about 25 tons Monday next. This shipment goes to Germany by way of New York and is of a higher grade than the last shipment made by McCarthy Taylor and Co.

The rumor that has been going the rounds for the past few days to the effect that Asbestos had been found near camp turned out upon investigation to be idle talk. It seems there has been some Asbestos of the short fibre variety discovered in this vicinity but it is of no commercial value.

Thos. McCarthy, who went to San Francisco to receive the first payment made by the purchasers of the tungsten properties, is expected to return next Saturday evening with his coin. We predict "a hot time in the old town" Saturday night.

Mrs. De la Fushell and her daughter, who have been suffering with typhoid fever for several days, are now improving. Little Althea is a favorite among her playmates as well as older acquaintances and all hope for her speedy recovery.

The rumor to the effect that Mrs. Coffee, who nursed Mrs. Cagle for some time, was herself ill with typhoid fever, proved to be an error. Mrs. Coffee has been suffering with a severe cold but is now almost entirely recovered.

Mrs. Rogers, who has been quite ill with pneumonia, is now slightly improved. Her daughter, who is attending school in Los Angeles, was sent for and is expected to arrive Friday evening.

Mr. Ed Hammond, who has been away with his family on their Christmas vacation, returned this week. Mrs. Hammond and daughter will return later.

Mr. Cagle, whose wife is just recovering from a long siege of typhoid fever is now suffering from the same dread disease.

Miss Gertie Geiselhart arrived Saturday from San Francisco and will visit with her brother Karl for some time.

Mr. DeGolia, who represents the new Tungsten Co., left last evening for San Bernardino on a short business trip.

Mr. Lew Norton, who was suddenly stricken down with Brain fever this

cheaper and absolutely fresh and pure.

No adulteration in the Steam Bakery's bread.

The sun at every degree of latitude where ships have ever been. He had caught whales in every sea from the Hudson gulf to Baffin's bay, and a few years ago he also sailed the mid-way of New Bedford and Greenland; the three-year-long voyage of the world cruise in a sailing vessel. He tried the adaptability of steam propulsion. For the big brick and iron ship he had the blackboarded iron plates, and he knew the Capt. Cray's machinery in substituted a petroleum engine for the old-fashioned iron machinery. From this he determined on the whaling grounds which machinery and back at night, sails without a prize. For the old method of throwing a harpoon by hand from a small boat he substituted a harpoon gun from the bow of his whaler, and with these improvements conducted a business that will soon make the few surviving New Bedford sailing whalers as obsolete as wooden plows.

I lay in his spare bunk, across the narrow cabin, by my own, and dreamed while I was finished a tale, somewhat like Kipling's "Three Sentences of a Fight between two crews for a seal whale in the Bering sea. Only a minute later, at midnight, I bumped my head against the top of the bunk to the quick awakening of an excited Norwegian craft crew from the top of the companionway. The captain leaped from his bunk. He waited not for shoes nor for other clothes than those he kept in, but hounded up the steps, shouting orders as he ran. While I dressed I could feel the quick stopping, the short advances and retreats of the engines, and I knew we were stalking game. When I reached the deck the captain had one hand on the gun, swinging it about on its pivot. With the other he was making signals to the engineer to stop, to go forward a little, or to go back. Following his eyes, I caught sight of our game. It looked like a huge, cigar-shaped piece of smooth, shiny, slate-colored India rubber, rising at regular intervals so that four or five feet of his diameter and 30 feet of his length showed like a mound on the smooth water. With alternate rising and dipping he was gliding smoothly forward, without apparent exertion, but with tremendous speed, and in a perfectly straight line. We were approaching him from behind at an angle, so that his course and ours were the sides of a V.

The captain on the raised platform in the bow, following with the mouth of his cannon the course of the whale, was the personification of alertness.

lifted to the surface. Locomotive whistles were blown, spectators cheered wildly and a throng of hysterical women gave way to sobbing. Even the impulse of pity sometimes needs the spectacular to arouse it. The tendency of effective pity to await a great stimulus speaks less well. There are people not buried in a trench who bear burdens almost as dire. Daily they face a struggle for existence. They need help. They do not require heroic endeavor to lift them but only a decent fellowship with the prosperous. The prosperous are apt to be busy. They wait until a specific tragedy appeals to them. Philadelphia Ledger.

### ANOTHER CAR OF TUNGSTEN.

Another car of Tungsten was shipped on Monday last. This car went by express via the Santa Fe and Erie railroads to Liverpool, England. This shows some enterprise on the part of Wells Fargo Agent here as it was thought impossible to make such a shipment by express in such bulk. The car contained nearly twenty-four tons of high grade ore.

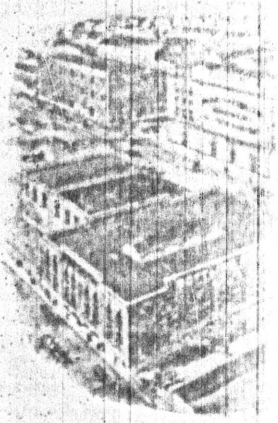

The deal has gone through and the car went out in the name of DeGolia and Atkins who represent the present owners.

Thomas McCarthy returned Saturday night from San Francisco with the first payment, ten per cent of the purchase price. Under the terms of sale fifteen per cent of purchase price must be paid April 3d, on July 3d, thirty seven and a half per cent, and the balance, thirty seven and one half per cent, October 3d, 1906. In the meantime all returns from ore shipments are to apply on the purchase price. C. S. Taylor is for the present superintendent of the works.

four or five feet of his diameter and 40 feet of his length showed like a mound on the smooth water. With alternate rising and dipping he was gliding smoothly forward without apparent exertion, but with tremendous speed, and in a perfectly straight line. We were approaching him from behind at an angle, so that his course and ours were the sides of a V.

The captain on the raised platform in the bow, following with the mouth of his cannon the course of the whale, was the personification of alertness. The crew were grouped behind him as eager and expectant as if they had never caught a whale before. One of them touched me on the shoulder and pointed silently a mile away, where a dozen other whales were spouting fine columns of vapor. When I turned again to our whale he had risen once more, and we were within 30 feet of him. Every person on the ship was in a state of tiptoe alertness. Suddenly came the crash of the gun. I saw a hideous red zigzag gash on the broad side of the whale; I heard the rumbling roar of the time bomb at the point of the harpoon exploding in the whale's vitals. On deck there was a convulsive pandemonium. The captain, in the delirium of the hunter at the death of his quarry, was shrieking shrill staccato orders. The crew were leaping to their posts. Suddenly I felt the bow of the vessel give a jerk beneath me, then tremble a moment, and slowly dip.

The whale had gone straight downward. The rope attached to the harpoon shot over the bow so fast that the eye could not follow; where it touched the wood a curling column of smoke arose. The windlass spun round like a boy's top. It hummed and buzzed with the noise of a flying locomotive. Coil after coil of rope leaned into nothingness like a politician's flower pots. Gradually the windlass ceased to spin. The whale had touched bottom. The captain signaled to back the ship, lest he should run up against the propeller. The rope floated slack on the water. There was a minute or two of silent, expectant suspense. Then, right in front of the bow, a large length had poked my finger against the flabby bladder, where the man was up, up, up and he was screaming in fear above

dant of the works.

Chicago, 1-16-06  
Mr. A. A. Nixon,  
Randsburg, Cal.

Dear Sir:

We take pleasure in handing you herewith our invoice for 25 barrels Atherton recently bought of us through our Coast Representative, Mr. Geo. Hale, who handed you warehouse receipts for same. The 25 barrels are now stored in the Bonded Warehouse subject to your order, and will be shipped to you in their original state of purity direct from Bond, as you need them in your business.

You are certainly lucky in getting hold of 25 barrels of Atherton of this ripe age, as old goods are getting very scarce; and while a great many barrels are still in bond we have sold them to our customers.

You are certainly giving your patrons the best that money can buy, because the Atherton whiskey is one of the best known and finest pieces of goods produced in the State of Kentucky, and we know that you will ultimately command the leading position in the Liquor Trade in your town.

We hope to hear from you frequently, and all your withdrawals will be looked after promptly whenever received.

Thanking you for past favors, and wishing you continued success, we are,  
Yours very truly,  
JULIUS KESSLER & CO.

**Notice of Non-Responsibility.**

From and after this date we will not be responsible for labor or material employed or furnished on the Papoose, tungsten mine.

### OWNERSHIP OF THE RADAMACHER MINE.

The Radmacher mine which has been idle for many years; since the disappearance of Mr. Radmacher 6 or 7 years ago, is at last to be worked.

After so long a time of silence, Mr. Radmacher is legally dead, and there is little doubt in the minds of most people, at all conversant with the known history of the case that he actually died somewhere on the desert after leaving Randsburg for some point in Arizona. He was a single man and his nearest heirs were a brother and sister living in Milwaukee, Wisconsin. The sister is dead but she left some children and they, with his brother, are the heirs.

There is a strange fatality in the history of the mine. Mr. Osman, a San Francisco attorney who defended the suit by the Visalia Company which ended in a compromise, is dead but is represented by his son. Mr. Green who died recently had an interest in the mine and was bought out, making four deaths of people connected with this famous property.

Young Mr. Osman has secured all interests, buying out the heirs in Milwaukee lastly and was here this week and

to misery. Doan's Ointment cures. At any drug store.

No. need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

The Kern County Abstract Company, 1518 19th street, Bakersfield, make a specialty of abstracting titles to mines, and guarantee their work to be satisfactory to the Land Department.

# Local Notes

Mrs. Rogers, who has been very ill is now much improved.

Mrs. Jones, of Barstow, who has been visiting her sister Mrs. McGinn left for her home last week.

The proposed Masquerade Ball to be given by the Yellow Aster Social Club, on Feb. 14th., is an event looked forward to with a great deal of interest.

We had a good rain last week and water is standing in many places on the desert. A few more such and we will again have a world of flowers this spring.

Mrs. Anna Morrison, daughter of Mr. and Mrs. Fahey, after a months visit with her parents left for San Francisco on monday evening.

William Houser, accompanied by Mrs. Houser went to Los Angeles a few days ago for the purpose of consulting physicians in regard to his foot, but up to today no one has heard anything from him.

Owing to the fact that they were not fully prepared the A. O. U. W. failed to install their officers a week ago last Tuesday, as at first intended. They will have their installation to night, after which they will have a dance and serve refreshments.

L. R. Dains is the new station agent at Johannesburg while Mr. Wolever is gone. Mr. Dains comes from Kingman Arizona now and was at Kramer for six weeks last spring. He is an experienced man and will doubtless be entirely satisfactory here.

E. F. Wolever, station agent at Johannesburg, has taken a lay off for sixty days and left with his family last night for Colton. His sight has been troubling him for some time and he intends having his eyes treated before he returns. Himself and family were well liked by everybody and it is hoped he

out at the mine. The mine is a very large low grade proposition in the El Paso hills about 15 miles north of Randsburg. There is considerable development work on it one shaft being down 200 feet and a crosscut at the bottom shows ore all through for 95 feet. There is a drift at every 50 foot level, one being in 185 feet. The ore assays from four to a thousand but generally about fourteen dollars per ton.

There are other good claims in connection with the Radamacher but all have been waiting for its development as it seemed to be the most promising. Louie Reeg joins the Radamacher on the north and his claim shows ore on the surface for 50 or 60 feet which all prospects a little. Water can easily be developed near Haggins well and a stamp mill will doubtless soon be in operation.

**FOR SALE:** Five room cottage with furniture. Best location in town. Address P. O. Box, 503.

# Comforting

## Many a Randsburg Will find the

To have the pains and back removed; to be free from annoying, dangerous ailments is enough to make any one grateful. To tell how this can be brought about is a comforting words to hundreds of Randsburg readers.

Mrs. F. E. Watson, corner of water street, says: "I was uncertain of the aching in my back until I saw advertisements about Doan's Pills. I attributed the work around the house, my feet almost the entire symptoms described in the advertisement were so similar to mine I bought a box of the pills and gave them a trial. If they had not brought relief I would have recommended them to more than one friend and acquaintance. I know of others in Redlands who have been benefited by using Doan's Pills."

For sale by all dealers at 25 cents. Foster-Milburn Co., New York, sole agents for the States.

Remember the name Doan's Pills, no other.

# MINING MAGAZINE

keeps posted

**MINING MAGAZINE**  
120 Liberty Street  
New York

Ed Hammond, an old time resident of Randsburg and one of our first business men has again left the camp, this time to stay, he says. He has lately been working for the Yellow Aster Co. finally thought he could do better for himself. Ed is a popular young man and one who can adapt himself to any condition in life and leaves here with the best wishes of hosts of friends.

John Foote, who has been so seriously ill with pneumonia is rapidly recovering. At his age it will of course, be a long time until he is entirely well, but with good care and good food and no unforeseen complications, he is on the fair road to good health. To our great surprise we today learned that Mr. Foote and the Editor of the Miner were old time friends and had some thrilling experiences together, separating in the fall of 1864 and never meeting since until recently in Randsburg. In next weeks Miner we will give a short account of one of our excursions.

### TUNGSTEN OWNERS HERE.

On Monday evening four men, Messrs. E. B. DeGolia, Mr. Bradley a mining engineer and president of the Bunker Hill and Sullivan Co., of Idaho, Senator Vorhees, of Sutter Creek and Mr. Street, representing large mining interests, came in on the train and stopped off at the tungsten mines. They came to Randsburg and stayed all night going to the mines next morning, taking the train from there Tuesday evening. Very little of their plans could be learned other than that a gang of men will be kept at work taking out ore and the low grade stuff will be shipped to Barstow for concentration in the Barstow Mill, the first car of ore going out Wednesday of this week.

### BUTE LODES STRIKE.

A five-foot ledge of \$100 ore is reported in the Butte Lode mine at Randsburg. The was encountered last week on the ninth level in the sixth shaft at 540 feet depth. The ore is a hard quartz lying between well defined walls with every indication of permanency. The strike is said to be the best yet made in the mine.

Best Coon characters, \$2.50, Joe Arthur and Oscar Thomas.

# Local Notes

Justice J. R. Manning is in Bakersfield, going down Saturday evening last on business connected with his office.

Dont forget that the Rev. John L. Pitner presiding elder of this district will preach in the Methodist church Sunday night.

E. B. Maginnis has again been appointed deputy assessor for Randsburg and vicinity by County Assessor J. M. Jameson.

O. E. Cheesebrough has been given judgment by default for \$827, in his action against the Mount Vernon Mining and Milling Company.

Chas. Taylor and Henry Giondoni have leased the 600 feet of the east end of the Little Butte mine to Jan. 1, 1907 including the machinery shaft and buildings.

The first car of Tungsten was shipped last week to the sampling works at Denver from the American Tungsten Company at Boulder, Colorado.

David E. Thomson has been appointed a deputy by Constable J. H. Arnold. Now when you go round the genial David you want to be a little more respectful.

W. G. Macomber has taken Mr. Irwins place and will collect for the Water Company. Mr. Macomber has a family in Los Angeles and will bring them up after the close of school.

The Batte mine is working in very rich ore and lots of it at a depth of 225 feet. The deepest shaft on the mine is something over 600 feet and shows valuable ore at the bottom. The prospects of the mine were never better.

John Singleton, president of the Yellow Aster Company, in company with the gentlemen who were looking at the mines went back to Los Angeles Friday evening last.

C. S. Pillor, manager of the St. Elmo

## Surprise Party.

The friends and neighbors of Mr. and Mrs. M. R. Irwin of Johannesburg who leave Friday for Ness county, Kansas, joined in a surprise party to them at the hall of the Lauristina Club in Johannesburg on Tuesday evening. A very large attendance was present, both from Johannessburg and Randsburg and the good feeling shown toward these departing friends was an indication of the esteem in which they are held after a long residence among us.

There was excellent music furnished by Youngs Orchestra, composed of Austin Young, Mrs. Mann' Will Atkinson, James White and A. W. Heister, Mrs. Herman Wynn also assisted. There were recitations and dialogues and a general good time.

Light refreshments were served about 10 o'clock after which a beautiful silver fruit dish was presented to Mr. Irwin from the Lauristina Club by their president Mr. Henderson. A handsome silver berry spoon was presented to Mrs. Irwin by the members of the Ladies Aid Society, Mrs. Len Cunningham making the presentation in their behalf. From midnight dancing was indluded in by a member of the young folks.

Among those present from Randsburg were J. A. Amis, Mrs. Murchie, Mrs. Peter, Mrs. Beeve, Mrs. Lidy, Mrs. Cunningham, Miss. L. Smith, Jewel Owens, Mr. and Mrs. J. J. Miller and others we failed to get.

Mr. and Mrs. Irwin and their daughter go to Kansas to make their future home and their friends here wish them every success. There are too many of the good people of Johannesburg leaving this spring, but of course we can find no fault if they think it best. We are only sorry that the conditions seem to make it necessary for them to leave us and wish them all manner of good in their new homes.

Many a Rands Will find

To have the pain back removed; to be annoying, dangerous is enough to make grateful. To tell how can be brought about forting words to burg readers,

Mrs. F. E. Watt corner of water street says: "I was uncom the aching in my back advertisements also Pills. I attributed work around the ho my feet almost th symptoms described ment were so similar a box of the pills and

quite his superior.

Chicago is to have a bank open all day and all night and every day in the week. What folly to start such an institution in Chicago where most people are now afraid to go out after nightfall for fear of thugs and fiends who assault women.

It is reported on what seems good authority that the Senate Committee on privileges and elections have agreed to report, 9 to 5, against Senator Smoot now occupying a seat in the Senate from Utah. This will be great news for all who are opposed to polygamy.

At the first joint conference of the Miners and Operators at Indianapolis on Tuesday of this week the operators voted no on the demand of the miners for a raise of 12 1-2 per cent and the miners voted no on a proposition to continue the present wage scale. As all agreements must be unanimous the Convention took a recess.

If the admission of Oklahoma and the Indian Territory into the Union as one State is defeated it will be through the obstinacy of Speaker Cannon of the House. Cannon simply opposes their admission because he cannot have his way in joining Arizona and New Mexico as one state, overriding the objections of nearly the entire population of Arizona, whose people would much rather remain a Territory than be bound with New Mexico in Statehood.

Royalty makes strange bedfellows. Miss Ena the English Princess, who is to marry the poor, little, degenerate King Alphonso of Spain, would not look at him, nor would his chances be considered for a minute, if he were not a little King. The lady is said to be physically a good stout English girl and mentally quite bright. The lifeshe enters can scarcely be a bright and happy one for her. But then she marries a King and that do settle it.

TWO CENTS A MILE

Smith, who left the party the day previous, ostensibly to go to Ballarat for horse feed, went on ahead, secreted themselves and did the shooting. The object of the ambush it is charged, was to drive back Johnson and Pearl, who represented eastern capitalists from whom Scott is alleged to have secured large sums of money, and who wished to investigate Scott's claims to a desert "bonanza." *R M 3-22-06*  
*2:2*

## Developments At Tungsten.

Charles Tayler, Superintendent at the tungsten mines, says they are now working 22 men and taking out a high grade of ore. The railroad company has put in a spur and they now load cars at the mine. The shipping to the Barstow mill has proved a success and they concentrate about five cars of ore into one of high grade stuff.

About the first week in April they expect to ship two cars of high grade, selected ore direct from the mines to Europe, Liverpool, England or to Germany. They have quite a village out there and they are putting on airs. Just plain Tungsten was not good enough for them they now call the new camp and station "Atolia". Just what that word means we dont know, but if you hear anyone saying something of that kind you will know that it is tungsten.

A new Fairbanks and Morse gasoline hoist has been ordered and is now on the way and efforts are being made to have a postoffice established with the soft, smooth-sounding name of 'Atolia.' Our genial friend Charlie Taylor, Superintendent, is despondent and says he is fourteen kinds of a d-fool for ever selling, or consenting to sell, a property in which he had a one sixth interest for \$114,000 when it is now so soon after, easily worth a million, and of course we are all sorry with him.

PUBLISHED EVERY THURSDAY.

CLYDE J. McDIVITT, Editor.

Subscription \$2.00 a year, strictly in advance.

Advertising rates on application

Entered at the Post Office at Randsburg, California, as second class mail matter.

THURSDAY, APRIL 5, 1906

A dispatch from Tonopah states that Mark A. and Claude A. Page, brothers, aged 27 and 21 years and both deaf and dumb from infancy, had discovered a good mine thirty-five miles from that place and sold it for a good figure.

Jeff Davis, Governor of Arkansas, is a candidate for the Senate. So far as unprejudiced outsiders can see, the Governor has little but his name to recommend him for any office, and that appeals to the sentiment of the ex-Confederates who are of course in majority down there.

## Our Davidson Again In Trouble.

Davidson is district attorney of Esmeralda county, Nevada, in which is located the town of Goldfield and at the last election Davidson was elected district attorney. He has been in more or less trouble all the time, but at last the people could stand his methods no longer and at a mass meeting held for the purpose, Davidson was denounced and a petition was sent in to the county commissioners of Esmeralda county de-

## New Firm.

Daniel Gunderson, principal of our schools, has bought the business of Thomas McCarthy and will hereafter have the entire newspaper distribution of the camp, as well as the book, stationery, cigars and notions of the business.

Mr. Gunderson has been a teacher in our schools for two years, is very well known and liked and will doubtless succeed in his new venture. His brother, Robert Gunderson, will have charge of the business until school is out.

## Another Car Of Tungsten.

A car of high grade tungsten ore was shipped last evening by Superintendent Charles Taylor, for the Tungsten company. This car, of 27 tons, goes by Wells Fargo express to Roberts and Bense, Hamburg, Germany, and will go to Chicago over the Santa Fe, thence to New York and across the ocean. The car is high grade and is probably worth \$10,000.

All the men interested in the 42 claims which were included in the sale of the Papoose mine were made happy on Tuesday of this week by the payment of the second installment of the sale price of \$170,000, which was fifteen per cent. or 25,500 dollars.

## Road Blocked By Landslide.

Another big landslide at tunnel No. 17 on the Tehachipi mountains has played hob with the trains. All trains on the Southern Pacific and Santa Fe were

William H. Hevren has resigned his position as manager of the Grand View hotel at Avalon, of which hostelry he is a part owner. We are sorry to hear this as we spent a very pleasant week at the Grand View last fall while he and his excellent wife were in charge and he was deservedly popular as a landlord. Whether R. C. Dale, who was chief clerk, will remain we have not heard, but it would be hard to find a more obliging hotel man.

Mr. Sanford, the City of Richmond man, reports having sold twenty-four lots in Richmond to residents of Randsburg and vicinity. In the drawing for the free ticket to San Francisco and return, when fifteen lots had been sold, Mrs. W. M. Houser was the lucky woman. All the names were put into a hat and shaken up, a little boy was blindfolded and the first ticket drawn was the lucky number. When fifteen more lots are sold another ticket will be given away in the same manner. Mr. Sanford is accompanied by his wife and daughter and they are stopping at the Houser hotel.

Thomas McCarthy, the man longest in business in Randsburg, coming here in September, 1896, and going through all the varied ups and downs, strikes and fires, but still the same genial, good natured Thomas, has sold his business, books, news and papers to Daniel Gunderson and retired on the first of this month. Mr. McCarthy has not fully decided what he will do, but rather thinks he will buy a farm somewhere and settle down to rural life. His interest in the Tungsten mines will give him enough money to establish himself very comfortably wherever he may choose to locate, where he and his little family may enjoy the future, without regret at the long years of privation spent on the Mohave desert. The Miner wishes him an abundant success wherever he may go, or whatever he may engage in.

about to take a contract to haul for Oscar Hart to Wild Rose Canon, Harrisonville, which will give him continuous hauling for five or six months. Harrisonville is about thirty miles from Ballarat.

# Local Notes

E. Hanston, of Keeley, was in the city this week.

F. H. Hudson of Los Angeles, came over early in the week.

Tuesday was payday at the Alabaster mines and many wore a smile Wednesday.

Dave Wagner has moved over from Johannesburg, having bought the Parsons property.

A. F. Judson, of Los Angeles, was over looking after mining interests early in the week.

J. F. Crow, representing the Cudahy-Pang Co., was a caller among the merchants this week.

In the school election held last week for trustee, S. B. Benson was reelected without opposition.

The Reno family have sold their property here to Henry Smalley and will remove to Los Angeles.

It now looks as though the coal strike in the middle west was going to hit hard on one side or the other.

The rainfall for the season up to date is above that of last year and there are prospects of still more showers.

About the only talk you hear of the street car lines opening up are those who walk from Johannesburg over.

Albert Burchan, brother of C. A. of the Alabaster mine, spent several days the past week visiting him.

J. R. Black, of the firm of Black Bros., Los Angeles, spent several days the past week here looking into mining interests.

A. G. Bandottini has been granted a liquor license for Randsburg by the board of supervisors at their meeting last week.

The heavens cleared on Saturday last and let a little sunshine in, though the rainfall has been of inestimable value on the deserts.

Val Schmidt of the Nine Spot Waldemar and Vienna quartz mines has re-

work is slow. They have one well down over 400 ft. and struck the water 30 ft. before reaching that point. They expect to continue at least another 100 ft. The new deep well east of Johannesburg has never been thoroughly tested, as it is a difficult job to pump that depth, but the company has nearly completed arrangements to test its capacity, which will be done soon.

## Fire in Johannesburg

The Harrison property, in Johannesburg, better known as the Cozy hotel, burned Sunday morning between 7 and 8 o'clock.

The fire is claimed to have started from a gasoline stove in the kitchen, and before warning could be given by a passerby the entire building was in a sheet of flame. After seeing the danger he hastened to the scene to give the alarm to inmates and found it contained but one guest, Fred Bell, a miner, who had been working on a double shift and had retired only a short time before, but being so exhausted was soon sound asleep. He finally was aroused but found himself enwrapped in smoke and flames and while still alive he is yet in a very precarious condition. His arms, throat and face being pretty badly burned and one eye badly injured.

After awakening and reaching the window he was so dazed by the smoke and flames he could not realize what to do, he being on the second floor, but was urged to jump, which he did and caught by those gathered sufficient to stifle the fall.

It is said that he lost \$40 in the fire and also a tin can filled with five cent pieces. The building was entirely destroyed and the loss will be in the neighborhood of \$1500. There was but little saved of its contents.

As soon as assistance could be gathered a bucket brigade was formed and saved nearby property which likely was the saving of the town from destruction.

# Local Notes

The public school closes May 4.  
Smalley has purchased the property formerly owned by Ed. Renz.

Trains have been going over the new service between here and Johannesburg this week.

J. D. Gullic and family have moved to Colliards where Mr. Gullic expects to go into the teaming business.

Thos. McArthur, who has been on a tour up in Mendocino county and other points, returned on Tuesday evening.

Mrs. L. Stall, of Los Angeles, and formerly a resident here, has been visiting Mr. and Mrs. Wm. Houser this week.

Mrs. Schonmaker has sold the cottage she possessed in the lower part of town to Mr. Christman, who will occupy the same.

The paint for the M. E. church, which the ladies of the congregation have been laboring so earnestly to raise money for has been ordered.

Miss Margie Cunningham left last Saturday for her home in Pomona, after a visit of three weeks with her brother and family, Mr. and Mrs. Len Cunningham.

In the batting and throwing of baseballs on the street several mishaps have been made, and last week one of the front windows in the post office building was completely demolished.

David Fagan, who has been conducting the chop house opposite the Houser hotel, locked up Wednesday evening and expects to leave later in the week to visit for a couple of months in Chicago.

The Yellow Aster Social Club will give a mixed old time minstrel show in a short time, so keep an evening open for it in your engagements. We can in all probability give you the date of our next issue.

In the boxing match last week between Bradley of Oklahoma and Smith of Randsburg, Bradley got a little the best of the latter and carried off the 60 per cent of the door receipts which was to go to the winner.

Constable J. J. Harding, who delivered Key, the half-breed Indian in the Bath Valley Scott case, to the San Bernardino authorities last week, spent yesterday in Randsburg recuperating from his hard trip over the desert.

A horse belonging to the Yellow Aster mining company, but on account of being lame one limb was left out on the hills

## Easter Sunday.

Sunday last being Easter Sunday, it passed off very quietly and but little stir was noticeable in town. Only one church having a pastor or Sunday school and regular services, it was given but very little thought during the day by the majority.

At the hour for evening services the Epworth League gave way to the Sunday school at the M. E. church and the school occupied the evening with exercises appropriate to the occasion.

It can well be said that the church was far inadequate to hold the congregation and school, as there are something over a hundred boys and girls in the school, ranging in years from the cradle up to young womanhood, and all arranged so as to take some part in the exercises. This created an anxiety in the hearts of some fathers and mothers to attend this service in which many of the participants were going to make their first appearance before an audience. Much credit is due the officers and teachers for the untiring patience given to the training of this young army who gave their parts almost without a waver. Some mothers possibly had to neglect home duties to accomplish their part in the work, but they succeeded and the congregation went away pleased as well as the parents and children of the school.

The program was of songs and recitations by the classes separately and some individually. The platform had been decorated with the wild flowers from the hillsides and bunting in the background; some of the classes also wore very pretty costumes. In closing the pastor gave a few remarks as to the day and the importance of making an early start in life for the Master.

"Now good digestion waits on appetite, and health on both."

By buying your cakes and candies at the Steam Bakery you will get them cheaper and absolutely fresh and pure.

Diphtheria, sour throat, croup. Instant relief, permanent cure. Dr. Thomas' Electric Oil. At any drug store.

## Goler Pumping Plant Accident.

A gas explosion occurred on Monday evening shortly after 5 o'clock at the Goler pumping plant of the Yellow Aster mining company, in which Mr. F. C. Frickie met with some very bad burns that will disable him for several weeks.

Mr. Frickie is the engineer on the night force there and had thrown into the firebox a piece of waste saturated with oil that it might ignite the oil when turned on, but the oil pipes had been turned too low and went out but with a little still occasionally dripping on the steam pipes which were not hot enough to ignite the oil yet were hot enough to turn the oil into a gas, so when the ignited waste reached this gas the explosion occurred.

This concussion in the fire box burst the furnace door open and scattered the burning oil over Mr. Frickie's arms and one side of his face, though the latter is not quite so serious as it is on his arms, owing to him having his sleeves rolled up above his elbows and his arms and hands being in line with the furnace door.

The explosion knocked him over backwards and some eight or ten feet from where he was working, but he still maintained his faculties and at once started for the back of the boilers and shut off the oil mains to the boiler. At this juncture he began to feel the effects on his face but had not realized that his hands and arms were burned, and started for his house a short distance only from the plant. Mrs. Frickie heard the explosion and at once realizing something had gone wrong in the plant started for there and met her husband on the way.

After calling over a doctor from here who dressed the wounds, on Tuesday, accompanied by his wife and a driver, came over here to have them redressed, standing the trip all right. The doctor redressed the wounds, which were a solid blister on the side of one arm and the burns extending from his finger tips on both hands up the arms for some distance above the elbow.

Mr. Frickie is the engineer who met with the accident up in the main mill along about the holidays last winter, wherein one side of his body and one arm was severely scalded by the bursting of a steam pipe, and had only been back on duty a short time, having been given the position over at the pumping plant that he might recuperate more rapidly.

friend,  
With the good that you failed to do,  
And the mark that you missed is the  
mark, my friend,

That you couldn't, or didn't, view;  
The failure you met was a mask that set  
On the face of a fortune, fair,  
But you didn't have heart for the task,  
and yet

You were winning, and almost there!  
You didn't have heart, for you failed to  
know

What lay in the deed undone;  
You had only a brief little way to go,  
And the prize would soon have been  
won;

But you pass to your grave in a dream,  
my friend,  
And you wonder, and wonder why,  
And you drift along with the stream, my  
friend,

And you pray, but you never try.

T. SHELLEY SUTTON.

## Tungsten in Colorado

BY R. H. VAN WAGENEN.

Under the above head the Mining Magazine publishes a long article on tungsten in the April number, and purports to give a list of countries where the ore is found, but among them fails to name our own State of California. Right here in Randsburg large quantities of purer ore are now being mined and milled than in any other location in the United States and in no other section do they get ore from the mine, without concentration, pure enough to ship. The article deals largely in scientific and geological terms and is not therefore understandable by the average miner, but below we give portions of it:

"In the course of an extended memoir published in the January, 1906, issue of the Bulletin of the Colorado School of Mines, which deals with the occurrence and treatment of tungsten ores in Colorado, and presents a review of the uses, alloys, etc., of tungsten, the author gives the following data concerning the deposits. The tungsten ores in Colorado occur in minable quantities in Boulder and San Juan counties. They have also been found in other localities, notably

and Nederland. In the first locality the tungsten occurs in quartz veins as streaks of black wolframite in the form of crystalline aggregates or finely disseminated through the quartz. The walls of the veins are in some cases granite gneiss, but more often granite porphyry, or a dike rock which may be vein granite. Generally the majority of the veins in the region strike at an average of N. 25° E.

The milling of Colorado tungsten ores may be divided into two classes, namely, (1) that adapted to San Juan county ores. As stated above, the hubnerite in San Juan county ores, and (2) that adapted to Boulder county ores. As stated above, the hubnerite in San Juan county occurs in masses and streaks clearly differentiated from the quartz, and the treatment of the ore is, therefore, quite simple. On account of the specific gravity (7.2 to 7.5), there is little or no trouble in obtaining a concentrate nearly free from quartz, but the pyrite, chalcopryrite and gulenite, the specific gravity of which approaches that of hubnerite, are very sure to find their way into the concentrate, and must be separated by a method not depending upon a difference in specific gravity. Formerly the purchasers of tungsten ores demanded a concentrate containing not less than 60 per cent.

At present the purchasers will take 40 per cent. which means from 50.2 to 60 per cent. wolframite and leaves a margin for 40 per cent. silica, so that the quartz carrying the slime values of wolframite is to a certain extent run into the concentrates and thus a larger saving is obtained.

The treatment of the tungsten ore at the Great Western Exploration mill is as follows: The ore is shoveled on a 2-inch grizzly, the oversize of which goes to a 7 by 10 Blake crusher. All the ore goes to a ten-stamp battery, the stamps of which weigh 1,000 lbs., and drop eight inches 80 times per minute. The battery crushes through a 20-mesh screen, and the product is laundered to classifiers which make two products. The larger size of these goes to a Wilfley concentrating table No. 1, while the slimes pass to another classifier, the coarse product of which feeds the Wilfley table

## Undone.

It isn't the deed that you do, my friend,  
It's the deed that you leave undone,  
For that is the deed you will rue, my friend,

When the course of your life is run;  
The little word that was never heard,  
The gift that you never gave—  
Oh, these are things whose memory stings  
To the verge of the very grave.

The tears that you might have dried,  
my friend,  
The sigh that you might have stilled,  
Oh, if you should, and you could, if you only would,

And you wished but you never willed;  
And maybe the cheeks that you never kissed  
Grew pallid, and cold and numb.  
And maby it was that the lips they missed  
Could have made the sunlight come.

It wasn't the deed you did, my friend,  
It wasn't the word you said—  
It was something—something you hid,  
my friend;

Which might have revived the dead;  
And the heart at rest in the dead one's breast

Had listened and longed for years,  
For the little word that was never heard  
Till silence had sealed her ears.

Oh, it isn't the race you run, my friend,  
And it isn't the prize you win,  
It's the race you never begun, my friend,  
And the race that you won't begin;  
For that is the race that would prove your pace

The race that you ought to try.  
But you let it go 'till your feet are slow  
And you lose, and you wonder why!

And the life that you live is dark, my friend,  
With the good that you failed to do,  
And the mark that you missed is the mark, my friend,

That you couldn't, or didn't, view;  
The failure you met was a mask that set  
On the face of a fortune, fair,  
But you didn't have heart for the task,

in Gilpin, Lake, Ouray, Teller and Dolores counties, while recently they have been discovered near Cripple Creek. Tungsten is also found in Arizona, South Dakota, Connecticut, Nevada, Washington, New Mexico, Oregon, Idaho, Montana and North Carolina. It also occurs in Australia, Cornwall, England, Saxony, Germany, Spain, Portugal, Sweden, Austria-Hungary, Bohemia, Canada, Brazil, Peru and Japan.

In San Juan county, Colorado, tungsten occurs in the form of mineral hubnerite as solid streaks and bunches, which are clearly differentiated from the quartz gangue. Though the streaks are often thin, the hubnerite is not scattered through and intermixed with the quartz, as is the case with the Boulder county wolframite. A common associate is fluorite in small quantities, while pyrite, chalcopyrite and galena usually occur in the vein or with the andesite country rock. The rock occurs at the Adams claim on Bonita peak, the dawn of Day, Sunshine and Minnesota claims in Dry Gulch, the Natalie and Big Colorado mines near Gladstone, the North Star, Empire, Victoria and Little Dora mines on Sultan mountain and at the Tom Moore mine in Burns Gulch.

In Boulder county tungsten occurs as wolframite and very rarely as hubnerite and scheelite. The gangue is invariably composed of quartz and the vein walls are granite gneiss, mica gneiss or porphyry. The wolframite is generally scattered in small quantities through the quartz, and forms a mass which must be crushed very fine for concentration.

The fine crushing gives rise to difficulties in milling the ore. The ore streak is not constant, but pinches out occasionally. Wolframite has been found at Salina, Wall Street, Gordon Gulch, Caribou, Nederland and Eldora, but mining is confined to Gordon Gulch, Caribou and Nederland. In the first locality the tungsten occurs in quartz veins as streaks of black wolframite in the form of crystalline aggregates or finely disseminated through the quartz. The walls of the veins are in some cases granite gneiss, but more often granite porphyry, or a dike rock which may be

Below w so far ha

opinion over the number of those killed at San Francisco, or who lost their lives in connection with the earthquake. General Greeley officially reports the number at 277 and says this is nearly correct while the coroner insists that 1,000 will come nearer the number.

The new crop of California cherries will evidently be beyond the reach of the ordinary householder if the price set for the first box sold in New York is any gauge of their value. They were sold one cherry at a time for the benefit of the earthquake sufferers at San Francisco and the box brought the fabulous sum of \$2140, the first cherry selling for \$105.00.

Los Angeles has established two camps to take care of the homeless, one at the Agricultural Park, where the exhibit hall will be prepared for women and children and the lower floor of the grand stand provided with cots for men. The other is in the Arroyo Soco where the camp ground of the Holiness church, has been secured covering an area of thirty acres, in which tents will be pitched and furnished. The latter camp will accommodate several thousands.

Thomas McCarthy has bought a farm near Ukiah, in Mendocino county, and left Randsburg with his family Tuesday for their future home, having closed up all his business here after a continuous residence since September, 1896, just when the camp was starting. He is of the opinion that he can do better, especially with regard to raising his children, on a farm than in the town. From the sale of the Tungsten properties, his business and his houses, Mr. McCarthy is possessed of a sufficiency of this world's goods to make him and his family comfortable for the future, if rightly managed, and there is little doubt he will see to that, having had experience with the other side. The best wishes for himself and family, of a lot of friends, go with him.

## Local Notes

There is quite a little camp at Tungsten and the roofs of all the houses have been painted red.

W. Greenwood was in from Tungsten Tuesday of this week, the first visit he has paid Randsburg for nearly a year and he only five miles away.

Mrs. Dr. Corwin left Monday evening for her home in Pomona after spending several weeks in Randsburg with her husband, Dr. Corwin.

R. H. Aisbach has struck good placer diggings at a depth of 40 feet in the Klondike district over east of the summit about eight miles from Randsburg.

January Jones, the noted mining man of Nevada, spent several days at Ballarat last week, returning to Los Angeles by way of Johannesburg Monday evening.

William Bouchard has moved his handsome little house out to Tungsten and contemplates building a larger one on the same lot on Batte avenue in the near future.

James Illingworth of Ontario, father of our C. G. Illingworth, after a week in Randsburg, the first time he has been here for four years, left for home Friday evening last, Mrs. C. G. Illingworth accompanying him.

The Tungsten people have installed two large galvanized iron water tanks and will now get their supply of water from Hinkley by the carload at a very much less cost. The two tanks will hold a full tank car of water.

J. C. Robinson and E. H. Spencer arrived in town on Monday of this week on business and will remain for a few days. Mr. Robinson is an old resident of the camp, but has not been here for five years until now. He finds many changes.

On Thursday of last week three prospectors coming from Slate range reached Hinkley suffering for water. The

## Election of Officers

At the semi-annual election of officers the Yellow Aster Social Club Tuesday evening E. B. Maginnes was re-elected president and Harry Hunt re-elected secretary; First Vice President, B. E. Hoch; Second Vice President, N. Borden; Treasurer, H. G. Laux; Executive Committee, W. M. Hauser, Oscar Thomas, L. L. Cutler and H. G. Laux.

## Church Social

The Ladies' Aid Society of the Methodist Church will give a lawn social in front of the church tomorrow evening, May 11th. There will be a short literary entertainment first, consisting of music, songs and recitations. Ice cream and cake will be served at 10 cents a dish. The ladies request all persons participating to keep off the grass and not to pick the flowers. Everybody is cordially invited.

## Claims Surveyed

The owners of the tungsten claims have had them surveyed preparatory to patenting some of them. There were 53 separate locations surveyed and marked at all the corners by 4x4 stakes set firmly in the ground. The work was done by Deputy United States Surveyor Walter Brown from San Francisco. The map made by Charlie Taylor of the Tungsten district was a great help in the surveying and Taylor was with Mr. Brown all the time, as he is superintendent at the tungsten mines.

This camp is located in San Bernardino county, about 100 miles this side of Las Vegas. Among the active companies are the Johnny Gold Mining and Milling company, which has 14 men at work and is preparing to increase this force to 40 or 50, and the Los Angeles company, which owns Stanford No. 1 and 2, and is working a force of 60 miners.

Last week the Los Angeles company shipped seven cars of gold ore and there is more on the dump which will be moved as soon as facilities are on hand.

One of the features which increase the promise of the camp is that water is plentiful. None of the wells are deeper than 25 or 30 feet, and at that depth a generous supply is obtained.—San Bernardino Sun.

## Mining Man Dies

John Andrews, a well known mining man associated with several desert mining enterprises, passed away at the San Bernardino county hospital last Saturday. He has been a resident of this state for nearly 35 years and died at the age of 52. He came to the county hospital from Barstow, having a large circle of acquaintances and friends both in that town and in Nevada City. The remains are being held at Aldridge & Stephens' undertaking parlors awaiting an answer from Andrews' sister, Mrs. Wyter, of 2228 Pacific avenue, Alameda.—Times-Index.

## Department of Mines

The directors of the American Mining Congress have passed a specific resolution condemning the bill introduced by Congressman Brooks to provide for the Bureau of Mines under the department of Commerce and Labor, says the Mining World. The bill presumably does not meet the broader plans which the congress has in mind for a national cabinet department of mines and mining, and officials of the American Mining Congress refused to accept it in any form as a compromise for a step towards the desired ultimate accomplishment of a position in the President's cabinet for the mining industry. As we

was an officer in the Continental army, and he himself was a captain in the Black Hawk war. Among the official positions held by Mr. Pomeroy while he was in the west were treasurer of Santa Clara county, member of the school board of San Jose for ten years and councilman in San Jose for eight years.

His three sons, A. E. Pomeroy, Edgar Pomeroy of San Jose and George Pomeroy of Los Angeles are all the members of his family who survive him. The body was sent to San Jose for interment.—Herald. R M 5-17-06 13

## Dangers of the Desert

As illustrating the dangers to those strange to the desert region, Peter Wilson has been taken to Needles to be treated for dementia. While Wilson was unloading machinery at Vontrigger, the new mining camp between Goffs and Manvel, in the eastern part of San Bernardino county, he wandered away and for three days roamed over the sand dunes, in all that time having no water or food. When found he was partially clad, his shoes and stockings were gone and his feet were bleeding from several lacerations received on the jagged rocks. This is the third man who has wandered away in the sand dunes in this manner within the past two weeks, though the first two did not fare so badly as Wilson.

An important strike of bonanza ore has been made in the south 400-foot level of the Cyrus Noble mine at Searchlight. A streak varying from four inches to thirteen inches in width, goes over \$1000 the ton; while the whole drift is in ore of high milling grade. The mill is crushing steadily for twenty-four hours a day, and it is learned that the ore is plating high values. Sinking has been resumed and will be continued to the 1000-foot level.

Little Bobbie MacKenzie comes of Presbyterian stock, but a relative recently took him to a church where the minister wore a gown.

"O auntie," said Bobbie, as the minister stepped into the pulpit, "is that the bearded lady I saw at the circus?"

A novel method of dealing with the evil of looting in the desert has been on the part of the western measures taken by the military authorities. A circular issued by Chief of Police Dinan states that ever a looter is caught a squad under the command of the five Sergeant Charles.

Members of the squad are taken to labor at clearing up the desert. Already Sergeant Charles has under him and they are growing. The task of the gang is given directly to the term each of them to serve. Already the square at Portsmouth square and the Justice are beginning to show old time appearance as a result of the work of the men.

Chief Dinan held the existence of Sergeant Charles becomes generally known and the result is a greatly decrease.

## Wonderful

of t

At about this time there is no prettier place in the green foothill than the desert where I have seen "home's where'er you roam" miss the sight of the desert of flowers that stretch to the power of the eye and are indescribably beautiful. Are many of you who only know the desert from the newspapers who are acting like a thief about the word true, and some of you if you'll just take the time you can prove it for yourself. The beautiful fields of flowers imaginable. I have seen cactus and such things and such delicate little flowers and your very heart aches and yet in many places

feet long and six feet wide. He selected specimens from different parts of the ledge and brought them to Daggett.

E. T. Hillis and Mr. Smith had the ore panned by Dr. Linhart, who said he could see the sparkle in the rock.

The owners of the ledge quickly secured a location notice and sent their prospector back into the desert to locate the property and work the claims. Mr. Joy is the man who made the discovery.

The members of the corporation that is to be are E. T. Hillis, G. B. Mier, Geo. Toenney, W. T. Varay, H. H. Smith, J. F. Duane, Jess Helden and also some men from Kelso, Otis and Los Angeles.

Mr. Smith is said to have been offered \$1000 for his share in the discovery.

George Toenney took a trip to the mine and brought back specimens. Some of the ore ran as high as \$7 to \$20 per ton. The owners intend to develop the mine and ship the ore.

**New Gold Camp**

Cima, one of the new mining camps which have sprung to life as a result of the Salt Lake road, is showing increasing activity, and the prospects are good for a permanent camp, in fact has about passed the experimental stage.

This camp is located in San Bernardino county, about 100 miles this side of Las Vegas. Among the active companies are the Johnny Gold Mining and Milling company, which has 14 men at work and is preparing to increase this force to 40 or 50, and the Los Angeles company, which owns Stanford No. 1 and 2, and is working a force of 60 miners.

Last week the Los Angeles company shipped seven cars of gold ore and there is more on the dump which will be moved as soon as facilities are on hand.

One of the features which increase the promise of the camp is that water is plentiful. None of the wells are deeper than 25 or 30 feet, and at that depth a generous supply is obtained. — San Bernardino Sun.

**Mining Man Dies**

John Andrews, a well known mining man associated with several desert mining enterprises, passed away at the San Bernardino county hospital last Saturday.

good reason for this. There seems to be no demand outside of the district. The American Mining Co. is aggressively in favor of the opening of mines. We do not regret that those who are working the important legislation, but the fact must be recognized. The prominent mine operators made to come into line.

**California's Old Pioneer Dies**

Charles Watrous-Pomeroy, the best known and best loved of California, passed away this morning at the home of Pomeroy, 217 West Adams Street, Los Angeles.

Charles Watrous-Pomeroy came to California in 1849. He lived in San Jose, where he lived and removed to Los Angeles. He was prominent with the bank of San Jose. Mr. Pomeroy was 98 years old when he died and his death was at an extreme age. Mr. Pomeroy was an officer in the California militia and he himself was at the Black Hawk war. Among the positions held by Mr. Pomeroy in the west were treasurer of Clara county, member of the board of San Jose for several years and councilman in San Jose.

His three sons, A. E. Pomeroy, Pomeroy of San Jose and Pomeroy of Los Angeles are all of his family who survived. His body was sent to San Jose for interment. — Herald.

**Dangers of the Desert**

As illustrating the dangers of the desert, a man has been taken to the hospital treated for dementia. He was unloading machinery at the new mining camp, the new mining camp of Goffs and Marvel, in the San Bernardino county. He passed away and for the first time.

# Local Notes

The wind it blows and is never weary.  
W. G. Macomber of Johannesburg was in town last Friday.

Rev. Amis returned Tuesday from a four days' visit to Los Angeles.

Jack Harrison of Johannesburg intends visiting Los Angeles during Fiesta week.

Last Friday a strong wind prevailed at this place, with a heavy downpour of rain for a few minutes.

C. H. Wolfe, an employe at the Yellow Aster mine, had his left arm broken Monday while handling an ore car.

Miners' tents and cabins dot the hills about Tungsten, all of whom are busy about that locality prospecting for the mineral more valuable than gold—tungsten.

Al Graham, Supervisor of Los Angeles county, and a mine owner here, is up looking after the development work on one of his claims.

Tungsten can rightfully claim being the neatest mining camp on the desert. With its painted houses with red roofs it presents a pleasing picture of color in the clear air of the desert.

C. J. Robinson and E. H. Spencer, of Los Angeles were callers at the Miner office today, having come up yesterday evening. Mr. Robinson while here is looking after some mines in which he is interested.

A. C. White, of the Sydney group of mines, his wife and boy, returned from Los Angeles last evening after a week's visit. While there Mr. White purchased an elegant new buggy and had it shipped up.

The social of the Methodist Church last Friday evening was held in the church instead of on the lawn as originally intended. Those who were present express themselves as having enjoyed a pleasant evening of feast and fun.

James McKamy, Democratic candidate for Sheriff, has been in town for past two days looking after his chances among the Democrats of Randsburg. He made the Miner office a pleasant

The attention of our readers is called to the announcement of our popular County Clerk, I. L. Miller for re-election. Mr. Miller has served the people of Kern county well and faithfully for the past eight years and if we must have a Democrat fill the position we know of none more obliging and courteous than our friend Miller.

Dr. Jillson and C. F. Reinhart, capitalists of Milwaukee, Wisconsin, were callers at the Miner office today. They are on their way to Ballarat to inspect some property there and while waiting over for the stage tomorrow visited the mills of the Yellow Aster Company. They are both interested at Silver City, New Mexico, in the Comanche smelter, which handles 450 tons of ore per day.

## Advertised Letters

The following list of letters remain uncalled for in the Randsburg Postoffice for the week ending May 16, 1906:

McDonald, Ben (3); Myers, John; Saake, C. H.

Persons claiming above will please say "advertised" and give date.

The Star Restaurant has recently enlarged their quarters and have also added ice cream tables. It is open all hours. All home baking. Fresh oysters served in all styles. We cordially invite the public to call and give us a trial.

No need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

## Your Druggist Will Tell You

that Murine Eye Remedy Cures Eyes, Makes Weak Eyes Strong. Doesn't Smart. Soothes Eye Pain and Sells for 50 cents.

The Kern County Abstract Company, 1518 19th street, Bakersfield, make a specialty of abstracting titles to mines, and guarantee their work to be satisfactory to the Land Department.

old friends here.  
La Fiesta this year promises to surpass in floral splendor anything of the kind heretofore attempted, despite the fact that the Canadian Imperial Potentate declared the thing off. He should get a move on and come to Los Angeles to see the sight of his life.

Robert Caruthers of San Jose came in a few days ago to work at the pumping plant about four miles above the Goler wells. The object of the development of water there is to work the rich ground of the Goler wash with water instead of the dry washing process.

Mrs. J. Moore and son Elden, of Hanford, accompanied by Mrs. Moore's mother, Mrs. L. E. Stepp of Clay Centre, Kansas, came in last evening to make a visit with Mrs. C. L. Grider, who lives here. Mrs. Grider is a sister of Mrs. Moore and Mrs. Stepp is Mrs. Grider's mother.

Charles E. Day is a candidate for Tax Collector to succeed himself. Mr. Day has held the office for some time and has conducted it on a good safe business basis and will prove a formidable opponent to whoever is nominated against him. His card appears elsewhere in this issue of the Miner.

A large bunker, at a convenient elevation, has been erected at the Tungsten mine. The ore will hereafter be dumped inside instead of on the ground as heretofore, making it easier to load and haul to the cars. The engine and hoist, which formerly stood some distance off, has been moved close to the shaft.

Since the earthquake exhaustive efforts have been made to ascertain the effect of the shock upon mines and tunnels. So far there is no recorded instance of loss of life in mine or one cent's worth of damage done. Even the underground passages of San Francisco's Chinatown are reported intact. This demonstrates that the safest place during an earthquake is under ground. It is also proof positive that earthquakes are mere surface disturbances, and are caused not by interior but exterior forces. David Starr Jordan's theory that the bottom fell out of the Golden Gate is all bosh. To the lay mind, and he hazards the guess, their solution lies in planetary attraction.

rhoea and summer complaint

# Local Notes

The Methodist Church was painted on the outside this week.

Send the Miner to some home friend, it will be cheaper than writing.

Mr. Hillard and wife left Johannesburg for Beatty, Nev., Saturday last.

Mr. Rott, the baker, is doing business in Los Angeles this week.

Chas. Adams was a passenger to Los Angeles Saturday evening last to take in the Fiesta.

W. G. Macomber is putting up a dwelling house on his property in Johannesburg.

Dad Hamilton and his family and his son and family arrived here the latter part of last week.

Supervisor Al. Graham of Los Angeles county, after spending several days in camp, went out a few days ago.

The front of the Mountain View saloon was given a coat of white paint and the lettering retouched a few days ago.

The chuck holes on Butte avenue have been filled up and the thoroughfare given a thorough overhauling and cleaning.

C. G. Illingworth is erecting buildings and sheds in the corral next his store to shelter his horses and wagons from the sun and wind.

Quite a number of people left Johannesburg and this place Saturday last bound for Los Angeles. They intend staying over during La Fiesta.

Mrs. Van and little daughter have left for their home in Los Angeles. Mrs. Van was the teacher of the Johannesburg school for the term just ended.

An intoxicated man named German entered the Bradley residence this morning, giving the women folks a bad scare. He was finally landed in the jug by Constable Arnold.

The friends of Mr. Albert Alexander, a former employe of the Rand Mercantile Company, will be pleased to know that he has opened a gents' furnishing goods store in Los Angeles.

## Another Car of Tungsten Shipped

Superintendent Charles Taylor of the Tungsten mines shipped another car of tungsten last Saturday to Germany. This car was billed out at 20 tons of high grade ore and went by Wells Fargo express. This is the fourth car of high grade ore shipped direct from the mines, without other process than that of careful selection, in the the last few months.

A car was shipped out to Barstow for concentration about a week ago, as the greater part taken out is handled in that way, three or four tons being reduced to one to avoid cost in shipping. The tungsten mining industry of this place is making remarkable progress and is remarkable, as nowhere else in the United States is there found such quantities of it, nor of such high grade ore. To show how little knowledge men had of tungsten, when the Randsturg railroad was built eight years ago, the graders cut right through the Papoose, which is the principal mine, and did not recognize the ore as valuable.

G. A. Baker left Friday of last week for a prospecting trip to the Funeral Mountains. He was well equipped, with a good little team he had recently purchased in Los Angeles and a good wagon, with plenty of provisions and everything necessary for camping.

The Star Restaurant has recently enlarged their quarters and have also added ice cream tables. It is open all hours. All home baking. Fresh oysters served in all styles. We cordially invite the public to call and give us a trial.

No need to fear sudden attacks of cholera infantum, dysentery, diarrhoea, summer complaint of any sort if you have Dr. Fowler's Extract of Wild Strawberry in the medicine chest.

announcement of J. R. Manning as a candidate for Coroner and Public Administrator. Mr. Manning has a wide experience of the office to which he aspires and if elected there will be no more conscientious and painstaking official in the county than he.

• Prof. W. A. McGinn, at one time principal of the Randsburg public school and owner of the Miner and an all-around popular fellow, is out for the office of Coroner and Public Administrator on the Democratic ticket. His home is at Oil Center, near Bakersfield.

• The placer ground in the old channel about three miles west of town is again being prospected. R. H. Alsbach sunk a shaft 40 feet deep and in drifting struck a reef which promises to be exceedingly rich, judging from the specimens of small nuggets of the first panning.

Jack Harrison and Kitty of Johannesburg are in Los Angeles this week taking in the Fiesta. He has rented his saloon to the Simaldi Brothers until the first of September, and when they return from Los Angeles they will make another camping trip to Mt. Whitney and put in the time hunting and fishing during the hot weather.

In another column our readers will find the announcement of R. L. Stockton for Superintendent of Schools. Mr. Stockton was elected four years ago after one of the hottest contests of that year and has proven himself a capable, sensible man, the schools having in no sense deteriorated under his management. If elected the people may feel sure of a safe, conservative school management.

Pete Jensen went out last Saturday evening and expects to be gone all summer. He first went to Los Angeles and will visit a sister in Pasadena and from there to Salt Lake to visit his mother, after which he expects to go to the region north of Lake Superior where he will endeavor to locate some copper properties he discovered some years ago, if not already taken by some one else. He does not expect to return to Randsburg before September and may be later.

Smart. Soothes Eye Pain and Sore for 50 cents.

## FIVE CLAIMS SOLD IN SUNRISE MINING DISTRICT

A mining deal, involving \$60,000 in gold and five separate groups of mining claims in the Sunrise Mountain Mining district, went through last Friday, the purchaser being H. E. Woods, of Los Angeles, who has bought of C. H. McClure and E. E. Yarbrough, of Needles, the mining property in question.

The groups involved are the Gold Dollar, Iron Horse, Storm Cloud, Hidden Treasure and Blue Bird, being the cream of the mining properties in the camp located 20 miles southwest of Needles. McClure is practically the discoverer of the district, as it was his energy which brought about the development of the first locations, which he secured an option on after an old miner had held them for years.

Mr. McClure won fortune and courage in the Bullfrog district, and, selling out there for \$40,000 he went to Needles. The day after his arrival he met an old miner who had some ore samples to show. He had displayed these same samples month in and month out, and had become a character about the town. Mr. McClure fancied the ore, and visited the claims. After one inspection of the ground he took an option on the claims for \$2500, giving the old miner \$50 to bind the deal.

On the third day Mr. McClure had several practical miners at work and before the week was out the ore uncovered was such as to spread excitement throughout the locality, and half the Needles rushed to the new diggings.

Mr. McClure took a partner in the person of Mr. Yarbrough, and three weeks from the time Mr. McClure paid his \$40 he had delivered to the miner the remainder of the \$2500. A few days later he gave Mr. Woods an option on the property for the sum of \$60,000, and it is this option that was taken up yesterday.

Mr. McClure is not the only one who has made a big stake out of the new district. Several Needles men have fared well, one being a brakeman, formerly employed by the Santa Fe, who has cleaned up \$15,000 from the sale of a group of locations. Now he is in the Vonttrigger country, owner of several promising copper claims, on which he has given an option to the Colorado Fuel and Iron company, the figures being in the neighborhood of \$5000. — San Bernardino Sun.

regard liability of employer, under which a workman injured could recover if he could show that the employer had failed to employ competent workmen, or of a sufficient number. The Kentucky decision, as we understand it, holds that under closed shop rules the unions have taken upon themselves the responsibility of determining who is and who is not competent and thereby the employer is released from liability for acts of incompetency which cause injury to other employees. This decision, if sustained, will have an application in many instances in which the liability of mining companies is involved. Mining World.

## SOCIALISTS PREPARE FOR ACTIVE CAMPAIGN

At a meeting of the Bakersfield Socialists on Tuesday the 22d the matter of a Socialist county convention was discussed, and it was decided to hold a convention for the purpose of nominating county candidates about the middle or latter part of June. The exact date, however, will not be fixed until later.

In the meantime steps will be taken to organize locals at Mojave and Randburg. In both these places it is expected that a large Socialist vote will be developed. At Randburg there are a number of members of the Western Federation of Miners, and these are all Socialists, it is said.

At an early date a delegation will be sent out from Bakersfield to organize locals at different parts of the county where there is any considerable number of Socialists. The expectation is that a full county ticket will be nominated and an active campaign will be made for the purpose of making as good a showing as possible this fall. — Bakersfield Echo.

## ALIENS' RIGHTS

The question of an alien's rights to hold mining claims has been discussed considerably. A good authority on mining law asserts that this question has been settled by a decision of the supreme court, in which it is held that an alien has all the rights of a citizen in the matter of locating and handling mining claims. The only difference cited is that upon application for a patent an alien must declare his intention of becoming a citizen of the United States before a patent will be issued by the government. — Mail.

## HOW BAKERSFIELD 500 EARTHQUAKE

At a meeting of the Bakersfield Chamber of Commerce last Thursday night President exhibited the following article from the San Diego Sun of May 24. The article was headed with a picture of a chubby baby all ready for the earthquake. The story was read with attention by the members of the Chamber of Commerce and the only remark made was that it does not happen in Bakersfield. The Bakersfield Echo has the following:

Here is a little of the story of the baby, who is wondering about the earthquake.

She is one of the babies who were born in San Francisco who for a week after the earthquake were fleeing as fast as their feet could carry them away from the city. They were hugged tight to the mother who had spent four strenuous days in the open air, and who had cuddled close from the winds that swept over the sea over the slavers whose homes lay in ruins. There has been no gloeful morning change of dainty little baby, but the "earthquake" baby is in a state of pligh, indeed.

But in the city of Bakersfield, many mothers, motherless babies, as they held their own hearts, whose hearts were full of sympathy for the miners, and their distressed children. It was easy for them to anticipate the greatest disaster that is how Bakersfield the "earthquake" baby.

It was planned to take the Bakersfield and no more. Scores of little tabs, soft towels, and big basins of scented soap found their way to the mining room which had been at the railroad depot, and all in the town turned out to do aprons and bathe the babies. All trains were met at the depot by representatives who took the crowded cars and at Bakersfield would bathe the babies. It was guaranteed that it would be right; that there would be soap and sponges and clean each little refugee, in addition

# Local Notes

Rev. Amis is having the Methodist Church painted.

Mrs. T. G. Clemens leaves tonight for a month's visit to friends in Riverside and Los Angeles.

Charlie Taylor, superintendent at the tungsten mines, spent several days in Los Angeles last week, returning last night.

M. F. Doland left Tuesday evening for Los Angeles to meet his wife and mother-in-law. They will return with him in a few days.

John Blake of Kramer and sister, Mrs. McNerny of San Francisco, are visiting in Los Angeles, the first time the brother and sister have met in 30 years.

J. M. Jameson, assessor, and I. L. Miller, county clerk, were welcome callers at the Miner office on Tuesday of this week. They were here extending the glad hand to the voters in the interest of their re-election to their respective offices.

Mr. Laird, the present District Attorney, was appointed to the office on the death of Mr. Ahern. He is an old resident and a good lawyer, and in his letter to the Miner office says that the business of the office is such that it will be well nigh impossible to get out here before the primaries but trusts that his Democratic friends will not forget him on that account.

Yesterday morning the little daughter of Mr. and Mrs. J. W. Bradley was buried in the cemetery across the hill. The child was born Monday morning and lived one hour more than two days, it only weighing three pounds with its clothes on at birth. The mother has been ill for a long time and is now in a critical condition, but there is hope that she will recover.

In the column, under the head of political announcements, will be found the name of D. J. McCormick for Justice of the Peace of this the 11th township. Mr. McCormick is known to all our people, having lived here since the summer of 1895 and is identified with the whole

Bakersfield went through quite a scare last week from fear of the overflow of Kern river, but the water after reaching the danger line gradually receded and they are now safe.

Russ Labroin, a miner working in the Yellow Aster mines, had the misfortune to have his leg broken at the ankle on Sunday last. He is getting along well and on the fair road to recovery.

## WADE-ERNST

A pretty little romance which began in Brawley about a year ago culminated in the marriage of Miss Margie Marie Ernst and George Royal Wade, a well-known business man of that town, on the morning of the 19th of this month, the eighteenth birthday of the bride.

The wedding was a quiet, pretty affair and only the near relatives of the bride were present. The wedding gown was a beautiful creation of white silk, elaborately trimmed in rich lace, while the groom wore the conventional black.

After the wedding breakfast the newly married couple hastened to the depot to catch the early train and were surprised to find that Cupid had revealed their little secret to a host of friends who were all there with congratulations and best wishes for a long and happy married life, and had not forgotten to bring an abundance of rice. On their return they will make their future home in Brawley.

The bride will be remembered by many people as the daughter of Mr. and Mrs. William Ernst who kept the Johannesburg hotel, where she spent her childhood days and received her early education. The bright, happy child grew into a beautiful young woman and her many friends here will wish her and the husband of her choice a long life of happiness and prosperity.

## ACCIDENTAL DEATH

A. C. Carroll was accidentally killed at the St. Elmo mine Saturday last. He was descending in the bucket and fell out in some way, falling 150 feet and killing himself instantly.

## DIED

Louis Windisch died last night for Los Angeles. He received a telegram from his mother who had died there. It was a great shock to make the trip before.

Mr. Windisch was a business man of this city and a kind husband and father. He died two years ago, but had improved since that time. He was of recent date and one child, a year of age here, a former marriage.

Mrs. Windisch died last night and after a long illness. She will probably make her home

The child was born Monday morning and lived one hour more than two days, it only weighing three pounds with its clothes on at birth. The mother has been ill for a long time and is now in a critical condition, but there is hope that she will recover.

In the column, under the head of political announcements, will be found the name of D. J. McCormick for Justice of the Peace of this the 11th township. Mr. McCormick is known to all our people, having lived here since the summer of 1895 and is identified with the whole history of the camp. He owns valuable mines here and we believe him to be possessed of the necessary qualifications to make a good justice.

WASHINGTON, March 28.—The President today sent to the Senate, among the nominations of California postmasters, the name of C. J. McDivitt of Randsburg. [Mr. McDivitt is the editor of the Randsburg Miner and has been a resident of the desert town for many years. Four years ago he was the Republican party's candidate for State Senator in this Senatorial district.]—Echo, Bakersfield.

Leo McCarthy has accepted a position in the Press office and is taking lessons in the art preservative. He bears the ear marks of a good newspaper man and may some day make his mark in the newspaper world.—Ukiah Press. That is good news from Leo, but in after years when he becomes learned and famous he must not forget that he took his first lessons in the Randsburg Miner office. We have always taken a lively interest in that boy and wish him all kinds of success.

Robert Witham, the man who was arrested with Fay Le Roy, charged with using the mails for immoral purposes, was discharged by United States Commissioner Van Dyke last week upon the suggestion of Oscar Lawler, U. S. District Attorney. The case against Mrs. Fay Le Roy is still on and a demurrer to the charges will be argued soon. District Attorney Lawler says the real culprits were Mrs. Fay Le Roy and another woman who acts as an agent. Witham is only 19 years old. A letter sent by him to Mrs. Le Roy figured in the charges.

Matches and mice, a strange combi-

### THE DESERT HOBOES AND THE TRAMP PROSPECTORS

What would you who feed an occasional hobo from your back doorstep and wonder at his feet worn from tramping over a few miles of well-laid roads, his clothes grass strewn from sleeping in hay mows, think of a tramp who covers hundreds of miles in a year, whose resting places are from 25 to 50 miles apart, whose watering places are equally distant from each other—in short, whose bed and beat, so to speak, are the vast floor of the desert?

Yet, there is exactly such a class, real tramps, yet as different from the tramps of cities as day is from night; tramps with nothing to do but eat. They do not have to beg; food comes to them through fear. They do not have to search out sheltering barns at nightfall, a greasewood bush is their shelter, the sands of the desert their couch.

Even Death valley, the most barren and dangerous of all deserts known to civilized man, has its hobos who wander up and down its dismal length through all seasons of the year save the very hottest part of the summer.

The headquarters of all desert tramps are in some small town on the borders of the region over which they wander. Daggett has more than its share of them. So also has Randsburg, Johannesburg, Ivanpah, and all the rest of the scattered settlements that dot the level plain. They are not numerous, these foot travelers, yet in proportion to the population they are probably as plentiful as their brethren of the coast are around San Francisco and Los Angeles.

Their methods of operation are vastly different from those of the coast hoboes. Leaving Daggett, Ivanpah or whatever little town they have cumbered during the months' of greatest heat, some time in late September or October they strike out alone across the desert. One peculiarity of this class of tramps is that they never move about in companies. Indeed, one desert hobo is usually the sworn enemy of all the rest of his kind. For clothing they have such things as they can beg, possibly a few

all trace of the murderer has been covered up and he is somewhere far out on the winding white trail, living on the food he committed an awful crime to get.

The circuit of the desert tramps who start out from Daggett frequently runs entirely around Death valley. From Daggett they go out to the Chino ranch or to Restings Springs, thence on across low lava hills into the Furnace Creek country and down to the old borax works at the north end of the valley. From there it is a short and comparatively safe hike of a couple of hundred miles into some one of the mining camps, so that their tramp, all told, reaches very close to 300 and sometimes 400 miles.

On the desert, too, there is another kind of tramp, by no means a criminal, and yet one of the most interesting characters of the whole west—the tramp prospector. He makes the easiest living of any man in the world, not excepting the promoter of wildcat mines. And, like the promoter he lives by fleecing the credulous. The tramp prospector is forever discovering a fabulously rich prospect. Back from the desert he comes laden with samples, supposedly from his new discovery, but really picked up on the dump of some established mine. Armed with these it is little trouble for him to enlist the help of some man with more money than knowledge of the desert to develop the "mine."

His first demand is, of course, a "grubstake." This will consist of a burro or two, if the man can be talked out of them; a sack of beans, bacon, flour, molasses and cooking utensils, as well as other things needful in the work he is going to undertake. Thus provided, the prospector sets out, camps at some well hidden water hole and there spends his time until the grubstake gives out. Then, providing himself with still better samples of ore, he returns, reports to his "angel" that there is yet more work to be done ere the best ore can be reached, and if possible, talks him out of a second supply of food. If the backer has not been warned he usually puts up the \$25 or

ISAACS, President.

are around San Francisco and Los Angeles.

Their methods of operation are vastly different from those of the coast hobo-boes. Leaving Daggett, Ivanpah or whatever little town they have cumbered during the months' of greatest heat, some time in late September or October they strike out alone across the desert. One peculiarity of this class of tramps is that they never move about in companies. Indeed, one desert hobo is usually the sworn enemy of all the rest of his kind. For clothing they have such things as they can beg, possibly a few earn a little money during their months of "idleness" in the town and spend that for clothing, but as a rule they are garbed in more different colors than was Joseph, though of more subdued hue.

Over his back the desert tramp slings a gunny sack in which are a couple of empty tin cans, a beer bottle or two of water and such food as he can beg or steal. Thus equipped, he invades a country which has brought more men to death than any other equal area in the world outside the great battlefields.

Usually his first stop will be some 25 miles out on a desert ranch or a solitary mining camp. On the way he travels as slowly as his food supply will let him. The cactus fruit is ripening about the time of year in which he reaches the cactus fields, and this helps him a bit on his way, and there are huge chuckawallahs (lizards of two feet in length or more with edible tails) to be had for the killing and with these he can live for some time on a small actual ration.

Where night overtakes him he sleeps, and by dear experience he knows which water holes he can depend on yet to contain the life giving fluid. Should one of these "tanks" fail him in time of exceptional drought he must push on to the next one or retreat to the settlement whence he came. If either of these is too far from him to reach he dies, as many of his kind have died in the years that are gone, uncared for by man or beast, for not even the dogs of the desert will accompany these tramps on their journeys. Teamsters and prospectors do not stop to bury the tramp when his body is found, which is not often; the sun and the storms of the boundless space take care of him, as in-

out of them; a sack of beans, bacon, flour, molasses and cooking utensils, as well as other things needful in the work he is going to undertake. Thus provided, the prospector sets out, camps at some well hidden water hole and there spends his time until the grubstake gives out. Then, providing himself with still better samples of ore, he returns, reports to his "angel" that there is yet more work to be done ere the best ore can be reached, and if possible, talks him out of a second supply of food. If the backer has not been warned he usually puts up the \$25 or thereabouts necessary to outfit the prospector, visions of coming wealth held before his eager eyes the while by the miner, and out the wanderer goes again. There are cases on record where one man has thus been flim-flammed three times, but twice is usually the limit. — San Francisco Chronicle.

was Joseph, though of more subdued hue.

Over his back the desert tramp slings a gunny sack in which are a couple of empty tin cans, a beer bottle or two of water and such food as he can beg or steal. Thus equipped, he invades a country which has brought more men to death than any other equal area in the world outside the great battlefields.

Usually his first stop will be some 25 miles out on a desert ranch or a solitary mining camp. On the way he travels as slowly as his food supply will let him. The cactus fruit is ripening about the time of year in which he reaches the cactus fields, and this helps him a bit on his way, and there are huge chuckawallahs (lizards of two feet in length or more with edible tails) to be had for the killing and with these he can live for some time on a small actual ration.

Where night overtakes him he sleeps, and by dear experience he knows which water holes he can depend on yet to contain the life giving fluid. Should one of these "tanks" fail him in time of exceptional drought he must push on to the next one or retreat to the settlement whence he came. If either of these is too far from him to reach he dies, as many of his kind have died in the years that are gone, uncared for by man or beast, for not even the dogs of the desert will accompany these tramps on their journeys. Teamsters and prospectors do not stop to bury the tramp when his body is found, which is not often; the sun and the storms of the boundless space take care of him, as indeed they did in life.

But if the water hole toward which he tramps does contain plenty of water he will sometimes camp near it for several days. To these springs, too, come occasional prospectors, alone save for their faithful burros. When one of those whose "grubstake" was extra large disappears, his taking off is usually charged to the Piutes. More often, as I am told by old desert men, some tramps have felled him with stone, and then, after robbing his saddlebags, or the pack on his burro, pushes on into the heart of the desert. It is days before the dead miner is discovered, sometimes the days run into weeks, and then

again. There are cases on record where one man has thus been flim-flammed three times, but twice is usually the limit.—San Francisco Chronicle.

Mr. P. J. Osdick was in town Wednesday.

C. H. Wynn of the Baltic mine was a Randsburg visitor today.

The editor of the Miner expects to come up on Friday evening's train.

The weather the past two mornings has been so cold that fires felt comfortable.

Rev. J. H. Amis, wife and two children returned from Los Angeles last Saturday.

By buying your cakes and candies at the Steam Bakery you will get them cheaper and absolutely fresh and pure.

George Neilson, who was badly injured by a cave-in at the Yellow Aster last week, is reported recovering rapidly.

Superintendent Charles Taylor will ship another car of high grade tungsten ore to-morrow. This is the fifth car sent out.

The Yellow Aster Social Club will hold a picnic and dinner at their hall on the Fourth, followed by a dance in the evening.

Pat Byrne has erected a temporary bower on the east side of the Mountain View saloon under which he intends to regale his many friends with the juicy roast of the barbecue on the Fourth.

Last Saturday evening big volumes of black smoke were driven by a strong wind over Randsburg and the surrounding country from the oil and forest fires from 50 to 100 miles southwest of here.

Kern county Socialists will hold a convention at Bakersfield, July 21, for the purpose of making nominations of candidates for all public offices to be filled at the general election November 6, 1906.

Mrs. Piles with her four sons and three daughters arrived here last Friday evening from Mansfield, Tex., near Fort Worth. They intend to make Randsburg their home and have rented the Asher house.

## DEMOCRATIC PRIMARIES

The Democratic primaries held for the first time last Saturday under the Crawford plan have proved to be a great success and Democrats throughout the county are pleased with the result. There were but four fights for nominations, these being for the office of Sheriff, District Attorney, Auditor and Coroner.

J. W. Kelly, the present sheriff, who stands for good government and who put an end to gambling throughout the county, won a hard fight over James McKamy, polling nearly twice as many votes and more than any of the other candidates. J. W. Laird was nominated to the position of District Attorney, which office he now holds, receiving more than one hundred votes less than Kelly and over three hundred more than his opponent, Platz. Stonewall Woody won the fight for Auditorship, and W. McGinn for Coroner. E. O. Miller of Visalia, received the nomination for State Senator.

The election at Randsburg passed off quietly. E. B. Maginnis was chosen as Justice of the Peace and J. H. Arnold, without opposition, as Constable.

The popularity of W. A. McGinn with Randsburg Democrats was shown by the vote cast, McGinn receiving 55 and Meroney 18.

The following delegates were chosen to the county convention which meets at Bakersfield June 30:

C. H. Wynn, Wm. Atkinson, Wm. Houser, H. Byrne, J. O'Leary, Samuel Dickinson, Pat Fahey, Fred Cutler and Wm. Benson.

## CEMENT LOCATORS

The boom in cement which has been on through the Tehachapi and Mojave country since February last, again caused a number of claims to be placed on record in County Recorder Lee's office Tuesday morning.

Claims, four in number, are located

Randsburg their home and have rented the Asher house.

The mine whistle sounded two alarms of fire last Saturday, one at 3:30 a. m. and the other at 7 p. m. One was the result of a barbecue fire back of the Dickinson saloon, where a bull's head was being roasted, and the alarm in evening was due to a bonfire back of the school house started by boys.

The reception tendered Rev. J. H. Amis and wife at the Methodist Church last Tuesday was a great success socially and a delightful and pleasant time was had by all. The young people's program, consisting of speaking, songs and crowning of Miss Hazel Murchie as May queen, were well received. Mr. and Mrs. Hamilton rendered several choice pieces of music on the violin and organ. Refreshments in the shape of fruit punch and cake were served.

R. T. Rochford of Los Angeles came up last Friday for the purpose of disintering and moving the remains of his father, R. B. Rochford, who died some time in 1898, to Los Angeles, and who was buried in the cemetery near Johannesburg. As the grave was unmarked and no record kept of the date of his burial, it was impossible to locate the grave. Mr. Rochford left Monday for Los Angeles and expects to return shortly and make another attempt to find it.

### TUNGSTEN CLAIMS SOLD

Mr. J. E. Pagh last Saturday sold the South Side Group of quartz claims, consisting of the Iowa, X-Ray, Tom Reed, Robert S and Michigan, to the Stauffer Chemical Co. of San Francisco. The claims are about one and one-half miles above the St. Elmo station in a northerly direction, and about four miles east of Randsburg. The prospects indicate valuable tungsten deposits.

### ADVERTISED LETTERS

The following list of letters remain uncalled for in the Randsburg Postoffice for the week ending June 27, 1906:

George W. Alexander, Thos. Doyle (2), G. E. Johnson.

Persons claiming above will please say "advertised" and give date.

office Tuesday morning.

Claims, four in number, are located about six miles north of Mojave and a short distance northwest of Warren station. They are taken up by Tom Ellington, J. L. Osborne, O. O. Osborne and John Tungate. Each claim is 1500 feet in length and 300 feet in width. The claims are designated as Portland Cement Nos. 1, 2, 3 and 4.

Cement in large quantities has been found in that section of the country and it has been said the quality is No. 1. The agitation over the Owens river bill, and the amount of construction work that will have to be done if the bill is successful has caused many Los Angeles people to make trips into the country and within a short time many more locations may be filed.—Californian.

### ROSAMOND DISTRICT

C. J. Callahan, mining engineer, has just returned from the Rosamond mining district, Kern county, where he has been examining the Black Cat, No Good and Old Carolina mines, owned by Messrs. Barr and Bailey and F. C. Ensign. Mr. Callahan reports the properties to be large low-grade propositions, having great quantities of ore in sight, assaying about \$6 per-ton, which can be worked at little expense. Development work is being done on the Black Cat and No Good mines, for which stamp mills have been ordered, to be in operation by September next. The Ensign Mining and Development Company has let a contract on the Old Carolina group of claims for tunnel and shaft work.

There are a number of successful mines in active operation in the immediate vicinity of these claims, one of which, the Hamilton mine, with a five-stamp mill running night and day, has turned out over \$250,000 in the past 18 months, to say nothing of the bullion produced by the Fairview, Exposed Treasure, Queen Esther, Karma, etc.—Times.

Candidates for second place on the "Bryan ticket" are already in evidence. The Nebraskan is indeed honored.

# Local Notes

Mrs. Jean Gustave and children went out a few days ago to spend the summer.

Emil Waldeck went out to Los Angeles Monday night to see a friend off for Germany.

P. J. Osdick leaves tonight for Los Angeles and Ventura county on a visit of a couple of weeks.

Mrs. Rinaldi and sister left Saturday evening last for a visit to Los Angeles and the beaches.

E. B. Maginnis has been appointed Justice of the Eleventh township for the unexpired term of J. R. Manning, deceased.

Mrs. Dora Windisch and little son left Saturday night for New Britain, Conn., to visit friends and will then return to her home in Hungary.

Jeff McElvaine, Assessor of San Bernardino county, came up Friday evening last to see about the poll tax of the boys that work in the tungsten mines.

The Democratic convention in Bakersfield last Saturday nominated our townsman, E. B. Maginnis, for Justice of this the Eleventh township, and J. H. Arnold for Constable.

A new postoffice at the tungsten mines, just over the line in San Bernardino county, has been established with the name of Atolia. Charley Taylor is the new postmaster and the office is about ready for business.

Mrs. M. F. Doland returned Monday evening from a three months' visit to her daughter, Mrs. Ernest Johnson at Oxnard. During her absence she was present at the birth of a new grandson to her daughter. The new boy is now two months old and of course the grandmother thinks he is the finest boy in the State.

## THE GLORIOUS FOURTH

Opened on the night before in Randsburg and a continual cannonading was

Schoonmaker second, \$1.50, and Ernest Pyle, third, \$1.

In the ladies' egg race for \$5 and \$2.50 there were four entries, Mrs. Rice won first, Mrs. Penshaw second.

In the ladies' nail driving contest to drive five nails, going back to goal each time, for \$2.50, \$1.50 and \$1, Mrs. Penshaw first, Mrs. Glover second and Mrs. Balschweid third.

Sack race for \$3, \$2 and \$1 nine boys completed, Edmund Young winning first, Walter Bozeman second and Eddie Shipsey third.

In the three-legged race for \$3, \$2 and \$1 Edmund Young and Walter Bozeman won first money, G. P. Fitzgerald and Robbie Neilson second and Frank Montgomery and Willie Peter third.

The day was excessively hot and everybody was out, but everybody seemed happy and to enjoy themselves and there was little or no drunkenness and an entire absence of quarrels or brawls of any description. Randsburg never had a more pleasant Fourth of July or one that all seemed to enjoy more.

## ANOTHER TUNGSTEN SHIPMENT

Charles Taylor, Superintendent at the Tungsten mines, shipped another car, the fifth, of high grade ore direct to Germany by Wells Fargo express. This car contained 20 tons and went out Friday evening last. The deepest shaft on the Papoose mine is a little over 150 feet and runs about the same.

## CARD OF THANKS

I take this method of publicly thanking all friends in Randsburg who so kindly aided and generously contributed to my assistance at the death of my husband, Louis Windisch.

A personal inspection of the canal work at Panama by the President ought to be the signal for record-breaking disturbances of the dirt in that neighborhood. Spades better had be trumps when Teddy goes after 'em.

The Missouri judge who decided that goods bought from a trust need not be paid for, thought he was giving the trusts a smashing blow, but it will be remembered that the trusts have spent a great deal of money and legal effort in proving that there are no trusts.

## THE YELLOW ASTER MINE.

The Yellow Aster continues to occupy first place among the great gold mines of the Southwest. The management is putting through an average of 500 tons of ore every twenty-four hours, which tonnage will be increased just as soon as present plans for additional water supply are completed.

The company has now two bored wells finished, one known as the Mountain well, the other the Goler well. From these two wells enough water is pumped and piped to the company's two stamp mills at Randsburg to treat 500 tons of ore a day, but as soon as the new wells that the company is now having bored are finished, it will be in a position to run its stampage up to 2500 tons of ore a month.

While the water was short the company took but a comparatively small quantity of its ore from the Upper and Middle Glory Holes, but now that the Mountain and the Goler wells are furnishing a more ample supply the intention is to again quarry from these two open cuts. It is very pretty mining, nothing easier; just blasting away in the open and sending everything down the rails to the mill.

Taking it all in all, there is not as this writer well knows, a prettier mining proposition in the world than the Yellow Aster; there is no sorting; every pound of the ore can be treated, and yield profitable returns. — Los Angeles Mining Review.

# Local Notes

Mr. C. H. Wynn of the Baltic mine left Tuesday evening for Los Angeles.

Miss Lily Miller of Santa Clara, daughter of Mr. and Mrs. J. J. Miller, came to town Tuesday and will spend her vacation with her parents. Miss Miller is a teacher and has taught in one school for the past nine years.

Randsburg is going through a heated spell, as well as all parts of the desert. Today is beastly hot and yesterday some thermometers registered 115 degrees, but generally it was about 106 to 110 degrees. Last night was one of the warmest nights ever experienced on this desert and it was pretty hard to get sleep.

Neil McLean arrived here last evening from Tonopah. Mr. McLean is one of the firm contractors that is building the railroad from Goldfield to Bullfrog and says that through trains will be running to Los Angeles before the first of December. He also informs us that within a week a contract will be let to build a railroad into Silver Peak and the line will be completed within a short time. Mr. McLean returns north tomorrow. — Inyo Independent.

The tungsten mine near Randsburg is operating and shipping the ore. At first the tungsten mineral (scheelite) was found only in detached boulders; now the vein from which these fragments come has been found. It is reported here that \$27,000 has been paid on the purchase price, which is \$100,000, and after paying all expenses, the owners have over \$25,000 in the treasury, all from the proceeds of the operation. — Mining and Scientific Press.

"Citizen's" communication to the Californian of this week giving the result of the Republican primaries last Saturday here, clearly shows the personal animus which inspired the writer. He rejoices almost as much as if it was a Democratic victory and sends the news to a Democratic paper. The editor of the Miner was voting the Republican ticket before some of these men were born, or others naturalized, and he

## JUDGE WELLBORN QUASHES

Judge Wellborn last Monday morning quashed a motion to dismiss in the case of the United States vs. Fay Leroy, who is held on a charge of sending an immoral letter through the mails, and who is known as the keeper of a house of ill-repute, and is a procurer.

Her attorneys offered the unique defense that the statute prescribes that the letter to be unlawful must contain matter liable to corrupt morals—and that as the letter in question went to a prostitute, no morals were likely to be corrupted.

Judge Wellborn ignored this humorous, can't-spoil-a-bad-egg defense, and Fay Leroy is still held.

Judge Wellborn also overruled the demurrer in the case of Arthur R. Wriely and others vs. the New Standard Concentrator Company and others. Times.

## PLACER RUMORS PUT DOWN AS A FAKE

"It is a shame and almost criminal to send men to the burning desert on such reports as that regarding the alleged placer strike at the Coolgarde district. Many a man will stake his last cent to get out there, believing that a strike has been made, when the facts are that nothing new has been found there, that the bunch of claims located recently is nothing but a fake scheme which the promoters are trying to unload on some one at a big price, on the reports that they are systematically circulating regarding a strike being made there."

C. C. Janney, the well-known mining man of this city, says the San Bernardino Sun, thus expressed himself, and he knows what he is talking about, as he has just returned this week from the very Coolgarde district regarding which the stories are being circulated. He says that much of the land that has been filed under these 21 claims is away up on the hillside, and that much of it is old placers that have been worked over several times.

There is probably no man in these parts who is more familiar with the Coolgarde district than is C. C. Janney. It was he, with the Meacham brothers, who made the original locations of placer mines in that district some years ago. They worked the placers and sold them, and they have been worked several times by successive owners.

Mr. Janney also characterizes the statement that the promoters of this scheme have found the lead from which this placer gold comes as ridiculous as the channel to the Coolgarde claims is controlled for two and one-half miles above those claims by Mr. Janney and his mining partners, W. F. Humble and A. C. Wirtz. They have been working this channel for some time, and thus it would be impossible for the other parties to control it.

Mr. Janney says that men going out to the desert now, while water is scarce and the heat intense, unless they are thoroughly familiar with the country, are likely never to return alive, and he characterizes it as almost criminal to circulate such reports. This district is gradually coming up as a substantial proposition, but will not justify the wild reports going out of taking from \$100 to \$500 per ton out of the dirt.

Mr. Janney says that another placer proposition that is purely a fake is being boomed near Lane's mills by Redlands parties, that a man cannot make day wages working it.

## WHEN THE CIRCUS CAME

More government by injunction. The mayor of Haverhill, an official who un-

only one canteen of water to go to a prospect a short distance away. Pollard of Rhyolite, who was at the grant, saw the outfit and saw the men leave camp. Mr. Maher, who left there Wednesday, says that up to that time the prospectors had not returned to their camp.

It is thought that they lost their bearings and were overcome by the heat. With the small amount of water they had they could not survive for any length of time in the fierce temperature, and the possibility of their finding water is exceedingly remote. — Bullfrog (Rhyolite) Miner.

## MELTED COIN

One of the most interesting relics of the conflagration to be found anywhere in San Francisco, and one that represents a loss of many thousands of dollars to the United Railroads, consists of various masses of melted coin that the street railway company recovered from its safes in the Rialto building. The blackened masses of precious metal are now stored in the office of Thornwell Mullaly, assistant to the president, at Oak and Broderick streets, and afford an object of much curiosity to visitors. Just what will be done with the melted coin is a problem that is worrying the officers and directors of the company. Mullaly is hopeful that the treasury department can be induced to make some ruling that will enable the company to recover something like the coin value of the money. Otherwise, should the company succeed in recovering only the bullion value, it will suffer a loss of many thousands of dollars. — San Francisco Chronicle.

## WHILE YOU WAIT LITERATURE

Before San Francisco had quit shaking enterprising book publishers were advertising complete and thrilling histories of the disaster, illustrated by our own artist "on the spot."

To read the prospectus one would think that the artist had been standing with his camera focused on the city, telling it to look pleasant and to think bright, cheerful thoughts just before the quake began. However, that was not the case. The artist was only there in his mind, by that means saving considerable in railway transportation.

No one who has ever taken 15 minutes out of a busy life to write a book of this kind can appreciate the labor involved. It is almost as much work as cutting coupons. The distinguished author must get all of the newspaper accounts and with scissors and paste pot is often obliged to work far into the night, particularly if he didn't start before 7:30 p. m.

les, California.

Saturday evening for Los Angeles. On his return he will take charge of the saloon on Broadway.

Mr. C. D. Curless was in town this week from Mountain Spring canyon, in the Argus range, some 40 miles north of Johannesburg. The Suspension Ridge Co. of Seattle made a failure in their work out there because of inexperienced help. Mr. Curless and George Stiles have their mill now and a large body of rich ore, but they will not begin active operations until the hot weather is over. They are also the owners of the Bonanza group 10 miles this side of Mountain Springs. There is a large body of rich ore at these mines and a 10-stamp mill which they will begin working in the fall. The Argus will yet prove a rich country.

T. J. Jacka had the misfortune to be seriously hurt at the Yellow Aster mines on Friday of last week. When eating his lunch in a shed on the hill a piece of rock from a blast came through the roof striking him on the head and crushing his skull. He was brought down to the doctor's office and operated on. His skull was cut into and the pressure on the brain relieved, a small piece of the bone being taken out. He is resting well since with a strong chance of recovery, although at first it was thought he had a very slim chance. Mr. Jacka had gone to work a few days ago, having just recovered from a severe spell of illness.

Thos. McCarthy, A. N. Evans and Marvin Luce have organized the Yokayo Lumber company and purchased the planing mill and saw mill property belonging to the Evans & Orr estate. They are now operating the planing mills at this city under the superintendency of A. N. Evans, one of the best mill men in the county and are working a full crew of men. They will start the saw mills at Low Gap in a short time, or as soon as things can be put in readiness for running and will furnish their patrons a grade of lumber equal to that to be found anywhere in the market. They have secured a number of acres of fine redwood timber from George McCowen in addition to that held by the Evans & Orr estate from which lumber will be cut. Marvin Luce will be in charge of the saw mills and the teaming. The business management of the plant will be in the hands of Thomas McCarthy, a well-known capitalist and business man who recently moved here from Randsburg.—Ukiah Republican Press.

Subscribe for the Randsburg Miner.

leave for her home in Monett, Mo., Monday evening next. There were present Mrs. J. J. Miller and daughter Lilly, Mrs. Ed McCreery, Mrs. W. D. Peter, Mrs. L. Beeve and Mrs. Fred Fricke. The ladies spent a very pleasant afternoon.

### STATE SCHOOL CENSUS

State Superintendent of Schools T. J. Kirk has just made public the census figures for the counties of the State for 1906. The total number of children of school age from 5 to 17 is 480,886. This is a gain of 21,571 over 1905, the largest gain the State has made in many years.

It is an interesting fact that while this gain is widely distributed over the state, nearly half the net gain is in the seven southern counties of California. Leaving out Ventura, which shows a slight loss, the gain in the other counties of Southern California amounts to 9710.

The census for Kern county is 4343, a loss of 13 since last year.

The greatest losses are in the northern mining counties.

### BIG PLACER DEALS

W. C. Clark of Goldfield, who returned this week from Emigrant where he was searching for his brother, is interested in the Gold lake placers where Wit S. Seller of Rhyolite took over an extensive tract recently. According to Mr. Clark the tract is located northeast of Goldfield and covers an area of 20x30 miles of ideal placer material. Surface assays have been taken that carry values from a mere trace to \$1.92. Bed rock assays have gone as high as \$90 and four-foot depths have averaged from several points \$28 per ton. The important item in this mining is that it may be cyanided for as low as 40 cents per ton, Mr. Clark states.

Several big investments have been made up to this time by outsiders. One involving 3200 acres was made by Chicago people; another of 3000 acres has also been closed. The consideration in both cases was \$50,000.—Bullfrog Miner.

# Local Notes

J. C. McCoy is taking a vacation and visiting the coast.

Doe Sproule, formerly an employe of the Yellow Aster Co., came in Monday evening.

Mrs. Ed. Maginnis is on a visit to her father in San Francisco, having gone out last week.

M. L. Streeter and wife have sold their house to L. Van Pelt and will leave for Los Angeles this evening.

Mrs. W. L. Warner and two children will leave this evening for Norwalk and the coast for a visit of a few weeks.

Mrs. O. S. Catland of Santa Ana came in Monday evening a week ago to stop until September with Mr. Catland and the children.

Don Nebeker and wife are recent arrivals in Randsburg. Mr. Nebeker is a brother of E. C. Nebeker, who has long been a resident of the camp.

Charlie Taylor, superintendent of the tungsten mines and postmaster of the new town of Atolia, is spending a few days at Los Angeles.

Born - To the wife of Roy P. Houser, on Monday afternoon, a boy baby. Mother and child are doing nicely and Roy, well, he is naturally the happiest man in town.

The mayor of Jersey City offers to perform marriage ceremonies free. After looking on all sides of the question the mayor probably sees the injustice of making a man pay for it.

Mike Drohnan, the popular conductor on the Randsburg road, is on a vacation of a month or six weeks. Mike is a lucky fellow, he owns one of the nicest foothill homes anywhere near Los Angeles, out beyond Glendale.

Joe Arthur, after several years of night watching for the Yellow Aster Company, closed his connection with that company last Friday night and left Saturday evening for Los Angeles. On his return he will take charge of the saloon on Broadway.

Mr. C. D. Curless was in town this week from Mountain Spring canyon, in the Argus range, some 40 miles north of Johannesburg. The Suspension Ridge Co. of Seattle made a failure in their work out there because of inexperienced help. Mr. Curless and George Stiles have their mill now and a large body of rich ore, but they will not begin active operations until the hot weather is over. They are also the owners of the Bonanza

Mr. Wetherby of Goler has gone for a little vacation to the coast.

W. H. Mattingly returned a day or two ago from a ten days' visit to the coast.

Chas. Wicklund and family have gone out for a long vacation after quite a siege of hard, close work.

Mr. Kersey of Caliente, a brother-in-law of Ed Shipsey, is looking for a business investment in Randsburg.

Pat Byrne now sports a new horse and buggy - indications of prosperity. Pat's lady friends will now be in luck.

P. H. McMahon, Superintendent of the Butte Lode Mining Company, returned Monday evening from a visit to Los Angeles.

Walter Turner is not yet entirely recovered from the shaking up he got in the railroad accident he was in near San Bernardino recently.

Thos. Cagle, for some time a resident of Randsburg, left last night for Thorp, Nev., where he has a good position. His brother will take in Bullfrog on the way out.

C. A. Laux, book-keeper for the Yellow Aster Co., left town a week ago on the sick list, but it is now learned he is improving and will be back again in time to make out the time checks before pay day.

Chas Adams returned from a two months' vacation to the coast and southern towns. He reports that the Buckboard mine has been bonded to Mr. Burcham of the Yellow Aster Co. and work will be begun to develop it in a few days and eventually a mill will be put on the property.

## SOCIAL PARTY

Mrs. Len Cunningham entertained a few friends last Friday afternoon in honor of Miss Alma Copper, who will leave for her home in Monett, Mo., Monday evening next. There were present Mrs. J. J. Miller and daughter Lilly, Mrs. Ed McCreery, Mrs. W. D. Peter, Mrs. L. Beeve and Mrs. Fred Fricke. The ladies spent a very pleasant afternoon.

## STATE SCHOOL CENSUS

State Superintendent of Schools T. J. Kirk has just made public the census figures for the counties of the State for 1906. The total number of children of

Local News

Notes

8-9-06

3:1

T. J. Jacka, who was seriously injured last week by being hit on the head by a rock from a blast, is recovering rapidly and is able to about again.

Mr. Mitchell, a prominent mining man, came up from Los Angeles and remained here several days enjoying the climate and having a merry time.

We are having unusually cool weather for the desert. This morning a slight shower fell. It is cloudy and threatening with prospect of a generous down-pour.

The case of Rinaldi Bros. against J. W. Copper was tried in Justice McGinnis' court Tuesday evening, the jury awarding judgment for plaintiff for \$14.80.

Mr. Laux, book-keeper at the Yellow Aster mines, returned with his wife after an absence of 10 days in Los Angeles and, after a few days stay here, left Wednesday evening.

Mrs. Marian Young and son Edmund left for Long Beach where Edmund will enter high school. Mrs. Young will then visit her sister in San Francisco for four or six weeks.

Rev. J. H. Amis has had a very successful week of revival services. We sincerely hope brother Amis will remain with us as his earnest work has been such a help to this community and Randsburg could not think of losing one who has endeared himself to us all.

D. C. Clark was accidentally killed at the Goler wells Saturday of last week. The bucket dropped into the well carrying Clark down with it. His body was taken out in the afternoon and Justice of the Peace McGinnis held an inquest, the jury rendering a verdict of accidental death.

A farewell reception was tendered Mrs. Flanagan Tuesday evening by the congregation at the Methodist church. The program included music, songs and recitations. Light refreshments were served. All joined in hearty well wishes to Mrs. Flanagan in her new home at Los Angeles.

The Board of Supervisors of Kern county passed an ordinance fixing the compensation of fire wardens at \$3 per day when actually engaged in the performance of their duties and all expenses incurred by them in gathering and fulfilling other purposes

**BURROS MISSING**

A great many people are wailing the loss of burros. Within past 30 days it is estimated that more than 100 burros have changed hands in a manner expressly prohibited by the statutes of the state of California made and provided, and which in such communities would be dominated by the burros. A short time ago, these faithful animals were plentiful in Rhyolite. After performing a day's work for their masters, they spent their evening hours as public scavengers, but few are seen now.

There appears to be a class of public scavengers who have little respect for the proprietorship of persons when it comes to the burro and will go forth plucking him wherever they find him the same as they would pluck a sheep, a chuckawalla or a rabbit. And so it comes about that the truest and most faithful dumb animal on the desert is without the protection of law.—Bullfrog Miner.

R.M.

for a couple of months and will have the team to use and enjoy while there.

Charlie Taylor, the genial Charles, has returned to the strenuous life at Atoha; after an absence of three weeks, enjoying six plunges a day in the briny deep, while stopping at Long Beach, afterwards visiting Hanford and the San Joaquin valley.

The first number of the Road Runner, a new, eight-page paper, gotten out by G. W. Glover and published in Pasadena, is before us. It is a neat, well printed paper and will undoubtedly succeed under the vigorous management of brother Glover. G. W. is the man who started the Miner nearly 10 years ago and whom some of our readers remember.

It is reported that the Ratcliff mine, at Ballarat, in Panamint district, is under option to Salt Lake mining men who propose to reopen it. This property has been idle for several years, having been closed down by creditors under foreclosure of mortgage. The mine is equipped with a 20-stamp mill and a pipe-line conveying water from Stone Corral three miles distant. — Mining and Scientific Press.

Val Schmidt, one of the pioneers of Randsburg, left for Los Angeles last week and contemplates a trip to the Orient. The Los Angeles Times has arranged for a party of 125 and Val, accompanied by his mother and two sisters, expects to accompany the party to China, Japan and the Philippine islands. They will be gone about 80 days and Val will be back to Randsburg about the beginning of the year 1907.

W. C. Wilson, County Auditor, was a visitor to Randsburg for a couple of days this week attending to business and greeting friends. Mr. Wilson had not been here since the last fire, although for many years doing business at Mojave, Garlock and Randsburg. He is not a candidate for re-election and will, at the end of his term of office, remove to San Francisco for future residence. The editor of the Miner is specially indebted for a specimen of the finest and most delicious peaches we have ever tasted, grown from trees planted by Mr. Wilson less than three years ago.

For one week the Ethel Tucker stock company has been playing to packed

and Mrs. Doland accompany the body.

**LOS ANGELES' NEW THEATER**

The new People's theater, Los Angeles, opened as a permanent stock house commencing Sunday matinee, August 5, with a company of 20 competent stock actors, headed by Miss Ethel Tucker. It is the intention of the management to present high class plays at prices within the reach of all—10, 20 and 30 cents, with 10 cent daily matinees. An entire change of bill will be given each week opening with the great western drama, "Across the Desert."

Keep your eye on Secretary Root. He may come back looking like seasoned presidential timber. Mr. Bryan's voyage appears to have ripened him, and Root's may do as much for that amiable cabinet officer.

# Local Notes

Miss Halisey of Goler is visiting Mrs. E. Shipsey.

Mrs. Lillian Rockwell was a passenger to the coast last evening.

Miss Mae Hamilton has returned from a short visit to Whittier and Los Angeles.

Mrs. W. H. Houser and children left for Los Angeles on a pleasure trip last evening.

David Alderman, who has been away on a short vacation, returned Monday of this week.

David F. Thomson has gone to Los Angeles on a short trip. There may be method in David's little vacation.

Mr. Falkins has just come back from a short outing, the first in more than a year, prepared for the strenuous life.

Dr. Graly Hall of Oakland, Cal., came in Tuesday night, but whether to stay permanently or temporarily we did not learn.

L. B. Alsbach, the young man who was in the Star restaurant for some time past, left for Los Angeles Tuesday evening.

O. D. Noe, who has been working for the Yellow Aster Co. at the Goler wells, has gone out on a three weeks' vacation to the seashore.

Claude Rice left for Oklahoma Tuesday evening, called home by a telegram but not knowing the cause. His home is in Oklahoma.

C. G. Illingworth and wife are off on a trip to Uplands and a visit to Mr. Illingworth's father and from there to Catalina for a short stay.

Mrs. J. Montgomery has been appointed a Notary Public by Governor Pardee and may be found during business hours at the postoffice.

Mrs. Hart says her boy Ronald is well pleased with the McKinley school at Gardena which he is attending and thinks he will get along fine.

Mr. M. S. Tarkington, superintendent of the American Mining Co.,

Rev. Father Eling came up from Needles last Saturday.

Mrs. Rockhold, son and daughter Murel left for Los Angeles last night.

Miss Joyce Amis, daughter of Rev. J. H. Amis, left last evening to attend the University of Southern California at Los Angeles.

It is rumored that Mr. Burns is soon to move to Goler and in honor of the event his friends are laying in a bounteous supply of flowers and rice.

## THE WILL OF JUDGE MANNING PROBATED

Certificate of proof of will in the estate of J. R. Manning, deceased has been filed. Val Schmidt, William H. Brown and John Arnold have been named as appraisers and notice to creditors ordered published. The will has been ordered admitted to probate. Letters of administration have been issued to Mrs. Laura Little.—Morning Echo.

## A VEIN OF RICH ORE STRUCK NEAR SEARLES

At a depth of 65 feet, on the American Mining Co.'s property near Searles, a rich vein has been struck containing free gold and sulphurets. A sample sent to Los Angeles assayed \$303 to the ton. A flow of water has been encountered and it necessarily has hindered development work, 3000 gallons daily have been lifted by windlass for some time past. M. S. Tarkington, the superintendent, expects soon to have an engine and pump in operation to take care of the water. He says the water is chemically pure. The mine is about 12 miles north of Randsburg at the base of El Paso peak.

Searles, a relative of the famous Indiana novelist of that name, was a Randsburg visitor last Saturday.

Gus Leisring, an old-time Randsburger, came in a few days ago from Goldfield and the Nevada camps, after a year's absence. He expects to work his mines near Johannesburg.

Tremendous desert rains have seriously interfered with the running of trains both on the Santa Fe and Southern Pacific roads for the past week.

Another terrible earthquake disaster in Chili and bordering states in South America this week. The loss of property and life is frightful according to the accounts.

H. A. Wilkinson has returned from a trip to Fresno looking very happy and explains that it is on account of a 15-pound girl baby, which arrived at his home during his absence. He left the mother and child both doing nicely.

Mrs. Patrick Fahey and son Charles left for San Francisco a week ago. Charles will enter the Mission High School for the next term and Mrs. Fahey will return after seeing him well established in the home of some good family.

R. W. Lewis, formerly of Randsburg and one time foreman for the Yellow Aster Co., is stopping with his wife at Johannesburg. He has been working at his own mines in Nevada since leaving Randsburg and now thinks of doing some work in the Argus and Slate range country.

S. P. MacKnight and Snedeker are out in the Panamint country. They left here with a team Friday last expecting to be gone about two weeks. Mr. MacKnight has some work to do in the line of surveying at some of the mines near Ballarat and will take in Harrisburg before coming back.

There is a regular boom in the freighting business out Ballarat way. It is estimated that there are over 1000 tons of freight to go from Johannesburg, the end of the railroad, to Ballarat between now and winter. There are 600 tons of water pipe to go to the Eagle mine at Harrisburg, to say nothing of lots of stuff for other mines. George Coffey, Jr., is steadily hauling from Johannesburg. George has a splendid team of big fat horses, 14 to a wagon, and when he speaks to them there is something doing.

No adulteration in the Steam Bakery's bread.

Mrs. Maxwell and children came in Thursday last from a visit to the sea.

Harry Glover returned last evening from a three weeks' visit to Long Beach.

Mr. D. Bartino and family returned Monday evening from a three months' visit to San Diego.

Mrs. O. F. Rinaldi and little son returned from a two months' visit to the coast on Tuesday evening.

The Garlock quartz mill, which had been running on tailings for some time, closed down a few days ago.—Toma-hawk.

Mr. T. W. Atkinson of the Sunshine mine made a hurried visit to Randsburg last week coming in one evening and going out the next.

The Skidoo mine, beyond Ballarat, is shipping in lots of freight these days. A carload of lumber was unloaded at Johannesburg yesterday for the mines.

Mr. C. G. Illingworth, after a week's visit to Los Angeles and the beaches, returned last Saturday. He says the weather below was "as fine as silk."

C. J. Wicklund, wife and four children came back Saturday last from a couple of months at the coast. Mr. Wicklund has gone to work again at the Sunshine mine.

J. W. Kelly, Democratic candidate for Sheriff of Kern county, was in town this week looking after his political fences. He left Tuesday evening feeling pretty good.

Mrs. C. V. Sanders of Big Pine arrived here on the 24th, coming by stage from Keeler to Mojave. Mrs. Sanders is a sister of Mrs. Lovett and will remain for a couple of months.

Miss Lilly Miller, daughter of J. J. Miller, who has been visiting her parents for a couple of months, left for Santa Clara on Monday evening where she will teach the coming winter.

Mrs. M. Gustave and two children came in Saturday evening from a couple of months' vacation at the seashore. The trip has been of great benefit to her, having gained in flesh rapidly while away.

W. A. McGinn, former principal of the schools here, now candidate for Coroner, spent Sunday in Randsburg. Mr. McGinn is making an early canvass, as his school at Oil Center begins on the 10th of September.

J. C. McCoy, the shoemaker, returned from a trip to the coast for his health a few days ago. He is so much im-

## THE LITTLE CHINESE MAIDEN

The Times' scholarship contest for 1906 is drawing to a close, and we would like to remind our readers not to throw away one coupon. Each one counts a point to some ambitious lad or lassie and why not save them and send them to your favorite? It means a little trouble to you but happiness to some young person. We are especially interested in Mansie Kim, the bright little Chinese maiden of Bakersfield, and would ask our readers to hand us all the coupons they can save and they will promptly be placed to Mansie's credit. This courageous little Miss is not after a cash prize, all she is working for is a tuition in some business college. She stands eighteenth today and a fair show of winning, so let us help her.

Coupons will be received at the post-office and placed to her credit.

## EMIGRANT SPRINGS

O. E. Cheesebrough returned Monday from a trip to the Panamint country and the new mines. He went on to Emigrant Springs, on the Death Valley side of the Panamint mountains, where is located the Skidoo mine, the property of Montgomery and Hovick. He says there is a great deal of work going on there, the company making all preparations for a big mine. The bunk house, already nearly completed, is a building nearly 100 feet long and the main company office is 40 feet square and will be well fitted up. There are few buildings there yet, nearly everybody living in tents. There are two saloons and one about four miles away at the Springs. The Skidoo mine is about 40 miles from Ballarat, the road continuing up Panamint valley until Wild Rose canyon is reached, then going up that and turning to the left, crossing the summit of the Panamint mountains. From the camp the view to the east is into Death Valley with the Funeral range of mountains beyond. They have made application for a postoffice to be called Montgomery.

## ANOTHER RAILROAD TO BUILD TO RANDSBURG

The Los Angeles Examiner says that E. H. Harriman, president of the Southern Pacific Company, has agreed to build a railway from Mojave into the Owens River valley at a cost of about \$2,600,000.

This announcement was followed up by the following in the Los Angeles Express:

"William Mulholland, water superintendent and member of the water board

# Local Notes

Mr. Glover was called to Los Angeles Monday evening on account of illness of his wife.

Dr. Grailey Hall's wife arrived in Randsburg a few days ago and is stopping at the Rand.

C. A. Burcham, vice-president of the the Yellow Aster mines, is doing business in Los Angeles.

Mrs. Austin Young returned Tuesday evening from an extended visit to San Francisco and Los Angeles.

W. H. Flanagan left Tuesday evening for a visit with his family in Los Angeles. He will return next week.

Charlie Koehn, the mayor of Kane Springs, was doing business in Randsburg this week, leaving for his own baliwick last evening.

J. J. Miller returned from Santa Clara last evening and reports Mrs. Miller somewhat improved in health, and hopes for her entire recovery.

Austin Young, formerly postmaster, but now of Harrisburg in the Panamint mountains, spent a couple of days in Randsburg last week, we are told.

Mrs. Gale, an old-time resident of Randsburg, but for several years a resident of San Francisco, came in Monday evening and is visiting her daughter Mrs. Hart.

The Junior League will give a clothes pin social at the Methodist Church Friday evening, October 12. A short program will be given. Chocolate and cake will be served.

October 3d was the day on which the last payment on the tungsten mines was to be paid. We have not heard definitely, but have no doubt the money was paid into the bank at San Francisco by De Golia and Atkins.

Congressman Gillet has presented his resignation and Governor Pardee will issne a proclamation calling for the election of a congressman for the unexpired term. This will avoid the collis

## THE BUTTE MINE

This deservedly popular mine closed down on the first of this month for an indefinite period. The Butte has been worked continuously ever since 1896 and has produced an immense amount of the yellow metal. In one respect it differs from most mines, in that it has been worked from end to end, the whole 1500 feet, and good money taken from all parts of it.

The deepest workings are something over 500 feet and at the greatest depth there is ore. Most mines have ore shoots, followed by barren spots, but the Butte has been worked the whole length. Of late it has been more and more difficult to discover ore in sufficient quantities to pay as well as formerly and it is supposed the owners, who are Los Angeles men, have concluded to stop for awhile, but every resident of Randsburg hopes and expects to see the mine soon again in full operation.

## MILL RUN ON SCREENINGS

Charlie Koehn has just finished a mill run of 50 tons of screenings from the Kinyon and Wedge mines which went \$9 to the ton. This was on the two-stamp mill owned by Parker and the run was made by Jack Nossier and J. M. Rice, who have a lease for a year. The ore f. om the Wedge and Kinyon mines was of very high grade and nothing was run but the best. So there are several thousand tons of screenings that will pay to mill. This first run was simply a test. Koehn said that if it went \$4 per ton it would pay to run. Nossier & Rice had an option for \$100 in case the first run paid. They paid the money and secured it.

## MILLINERY

E. Mable Thompson will be in Randsburg at Hanger Hotel about Oct. 12.

of our working men.

David Thomson is the regular Republican candidate for Constable of the Eleventh Township. Dave has lived in this community a long time and is well known by everybody and there is not a more accommodating man here. He will be just as good a man after his election to the office to which he aspires.

E. B. Maginnis, Justice of the Peace, had the misfortune to break his leg a few days ago and will be confined to the house for many weeks. It was done by simply turning round quickly and slipping down. He is getting along very well and does not suffer much pain. His leg will be put in splints today, the inflammation having gone down sufficiently for the purpose.

H. J. Giordoni and wife left Monday evening for a visit to the coast. They will spend some time at Los Angeles and Santa Barbara as well as other points. The trip is ostensibly for recreation and pleasure, yet they expect to combine business with it, as it is their intention while away to purchase a home in some suitable locality where they may enjoy life after the long and arduous years spent on the desert.

In the Rademacher district, over in the El Paso hills, W. C. Thomas has struck a heavy vein of 40 per cent copper ore which he and Mr. Targate are developing. The owners of the Volcano mine near Garden Station are working a force of men and running a tunnel and the prospects are exceedingly good. There is considerable interest manifested in this section and if the copper prospects hold out there will be considerable more.

E. E. Armstrong, Republican candidate for Tax Collector, spent a couple of days in Randsburg this week. He is a pleasant, agreeable man, an old resident of Kern county, and when taken into consideration that he is seeking an office in which the present incumbent has already served 12 years and is asking for a fourth term it would seem that he should be given a chance, as these county, or State offices, were not created for the monopoly of one man.

speaker promised \$40-bicycles for \$10. The speaker was only applauded twice during his hour and a half of discourse.

Randsburg has been well patronized by county politicians in the past week. First we had A. Weaver, Republican candidate for Recorder and W. S. Millard, Republican candidate for County Clerk, who spent a couple of days getting acquainted and interviewing the voters. Then Chas. A. Lee, Democratic candidate for Recorder; R. L. Stockton, Democratic candidate for Superintendent of Schools; Mr. Macmundo, Democratic candidate for Surveyor and J. R. Gist, Republican candidate for Auditor. These gentlemen stayed two days and saw many of our people. Mr. Stockton has served one term and is seeking a re-election. Mr. Lee is seeking a third term, while Mr. Macmundo and Mr. Gist are new men.

### ADVERTISED LETTERS

The following list of letters remain uncalled for in the Randsburg Postoffice for the week ending October 10, 1906:

- Allen, S. B.
- Birtrum, W. C.
- Mitchell, Allan
- Wilson, Mrs. Pearl

Persons claiming above will please say "advertised" and give date.

C. J. McDIVITT, P. M.

### TO WHOM IT MAY CONCERN

Notice is hereby given that, whereas, I have in my possession one (1) lady's watch, given to me as security for a loan of money and, whereas, said loan of money has not been paid. Now, therefore, I hereby give notice that I will on the 13th day of October, 1906, at public auction, sell said security to the highest bidder for cash. Said auction to be held at the hour of 10 o'clock a. m., in front of the Justice's office in Randsburg, Cal.

DAVID E. THOMSON.

### MILLINERY

E. Mable Thompson will be in Randsburg at Houser Hotel about October 13, 14 and 15 with a very fine line of millinery.

Don't miss this opportunity of getting a fine hat at a very reasonable price. Call and see the line. I am sure I can please you. Everything up-to-date.

E. MABLE THOMPSON.

PLAIN SEWING wanted at her home by Mrs. Ritter.

Taft tried to wear out Cuban folly by sitting still while the other fellow threw the fits, but the fits were too violent.

Cuba shouldn't be discouraged. Plenty of other nations have made a failure in their first attempts at self-government.

Candidate Hughes must be a great man, for see the success he has attained in spite of the handicap of those whiskers.

One reason why Tammany readily forgave Mr. Hearst is that it is still doctoring the sore places where he jabbed it last spring.

Senator Clark of Montana is suffering from a broken rib. He did not get it from looking at his new and wonderful house in New York, but in an automobile accident in France.

The Pennsylvania politician does not care very much who builds the \$4,000,000 capitol so long as he has the \$9,000,000 job of furnishing it.

Cubans who, in their recent rebellion against Spain, thought they were freeing Cuba, can now figure it out whose game they were playing.

To be clear above suspicion bank examiners should smoke stogies and carry around at all times a receipted bill from the dealer who sold them.

The reading public is just beginning to understand why Senator Platt has been taking so little interest in the troubles of other people lately.

The mere fact that he had a very pleasant conversation with President Roosevelt recently ought to help Hughes to carry Oyster Bay in November.

The warlike Bishop McCabe is still anxious to make an attack on

Mr. Hearst is being charged with having sent money into Mr. Littlefield's district to insure his re-election. By the time Mr. Littlefield has distributed the credit of his victory he will have none left himself.

Speaker Cannon and Secretary Shaw have completed their tour of Missouri and the Republicans now have some one to blame if on the morning after election it is found that the "mysterious stranger" has flown the camp.

### BLAST REVEALS RICH SILVER DEPOSIT AT CIMA

Native silver in great lumps was dug from a ledge uncovered at Cima, a desert station along the San Pedro, Los Angeles and Salt Lake railroad. The ledge is a wide one, and specimens taken assay as high as \$750 to the ton. The locators are two Los Angeles men. At the time the strike was made one of the locators was in Los Angeles. The other dug out several lumps of the white metal, enough to fill several sample sacks, and last Thursday went through on the Salt Lake to Los Angeles, to carry the evidence of luck to his partner.

The claim lies not a great distance from the Salt Lake depot at Cima. The two men have been working on the property for several weeks, believing they had a copper proposition, when a discharge of powder opened up the real ledge, and in amazement the miner found himself gazing at a great rent in the living rock which was white with native silver, while about lay the metal in chunks. Naturally he was greatly excited.

Assistant District Attorney H. M. Willis was a fellow passenger on the overland with the lucky owner, and he showed his samples, which looked good to the attorney. The strike is said to be the biggest of its kind ever made in that section, in fact the entire county, and excitement at Cima is intense. — San Bernardino Sun.

And it is agreed by the experts on the ground that when the Anxiety and Copper Shoe properties are started toward development, an event to take place within the next 10 days, the Furnace Creek South Extension, as the corporation is known, will prove to the satisfaction of the least pessimistic that Greenwater is the undoubted leader among the copper districts of five continents. —Tonopah Miner. R.M.

11-8-06 10  
NEW MINERAL SECTION ADJOINING DEATH VALLEY.

In the Avawatz mountains, San Bernardino county, adjoining the westerly edge of Death Valley, a new mining region is being opened up; and yet it is not so new, for, as widely scattered arastras show, Spanish miners worked the surface nearly 100 years ago.

The new section has just formally organized into the Crackerjack gold mining district. The district is about 36 miles square. It is about 60 miles northwest of Dagget and the nearest railroad point is Silver Lake station, 23 miles distant, to which the Tonopah-Tidewater railroad has lately been completed.

The district contains gold, silver copper and lead.

Nearly all the locations in the district have been made by mining operators who have won experience in the Nevada districts, and the Crackerjack is considered by these men to be a part of the mineral belt that is receiving exploitation at Tonopah, Goldfield, Bullfrog and Greenwater. The latter is joined by the Crackerjack on the southeast. The district is rapidly filling up.

The Crackerjack Gold Mining company holds four claims, on which there is being sunk a shaft all in ore, and a three-foot ledge of ore assaying \$114 and a two-foot ledge running \$128 per ton have been opened up.

Joining the Crackerjack claims on southeast Messrs. John Anderson, L. A. W. Johnson and A. H. Schliebetz, Los Angeles mining capitalists, have a property called the Tom Boy. Only a little development work has been done on this property, but assays of the ore taken out run up to \$5000 per ton, and the continuity of the ore body is shown

Angeles corporation which has done the most extensive development work in the district, having driven a tunnel 435 feet.

A townsite will be laid out at once adjacent to the Crackerjack company's claims, and a stage line is soon to be operated from Silver Lake Station. The new town will also be connected shortly by telephone with the railroad station, a company for the constructing of such a line having been practically organized. R.M. 11-8-06 p.)

### A DEEP SHAFT

At the Victoria Quartz mine, Bendigo, the sinking of the shaft has been completed to the great depth of 4300 feet, and the mining inspector has visited the mine and taken observations. He found that at the plat at 4020 feet the temperature was only 76 degrees F., while at the same spot there were 10,000 cubic feet of air per minute passing through the crosscut. At the bottom of the shaft the temperature was 86 degrees, and the water running out of the ground registerek 114 degrees. There was also a slight circulation of air at the bottom of the shaft. —Mining and Scientific Press.

### THE NEW HEARST BUILDING

When completed, as it will be within 12 months, the Hearst building, San Francisco, will contain over 600 offices. The cornices and window penetrations will be decorated with highly-colored tiling of the glazed variety and the shaft of adobe yellow will give a Spanish Mission style to the building, which has been the motif adhered throughout the preparation of the plans.

The architects have been given a free hand and the contract calls for a building that is as fire and quake proof as is possible. One measure to be taken to insure the latter quality is the depth to which the foundations will extend underground, fully three stories being below the level of the street. The steel frame of the building itself will be modeled on the Eiffel tower in Paris, with wide-spreading base and tremendous arms of steel incased in heavy meshes of metal laths, which will reinforce the solid concrete walls.

# CALIFORNIA MINING NEWS

## Greenwater--More Copper Ore in Sight Than Arizona Combined--The Crackerjack Mining to be Rich in Minerals.

WATER. great quantities are rolled into wire for many purposes, including submarine cables, long distance telephone and transmission line for light and power service. The kitchen pots and pans explain some of its consumption. Its use as an alloy is astonishing. Red brass is 90 per cent copper. Yellow brass is two-thirds copper. Of the finest gold jewelry nerrly 25 per cent is copper. Every ship propeller contains more copper than anything else. And copper makes up one-tenth of the weight of every silver coin minted by the United States.

In 1894 copper sold for only 9 cents a pound. Now it brings 22 cents. The copper district of Lake Superior yielded huge profits from veins and ledges where the copper in the ore ran as low as 1 per cent. The Butte dividends were paid in great part from a 4 per cent tonnage. With the uses for copper increasing from day to day, with the supply heretofore available lagging farther and farther to the rearward of demand, the reason for the excitement over the Greenwater discovery and its subsequent developments scarcely needs elaborate emphasis.

At the present time it seems to be agreed that the cream of the properties at Greenwater is defined by the Copper Blue claim, on which Patsy Clark has made so phenomenal a strike and the Anxiety and Copper Shoe claims, adjoining the Copper Blue and showing a continuation of its great ledge. And it is agreed by all the experts on the ground that when the Anxiety and Copper Shoe properties are started toward development, an event to take place within the next 10 days, the Furnace Creek South Extension, as the corporation is known, will prove to the satisfaction of the least pessimistic

by a canyon outcrop 200 feet below the surface.

Captain John Hargrave, formerly manager of the Anaconda copper mine at Butte, Mont., now a Rhyolite operator, has a group of claims northwest of the Crackerjack company's holdings with an 18-inch vein going up to 1300 ounces of silver to the ton. These claims have been bonded for \$35,000.

Fred Bender, another Rhyolite operator, holds 60 claims showing surface values at the rate of \$41. Interested with Mr. Bender are Oscar Seals, Jas. McCauley, E. Van Fleet and S. P. Kimball, also of Rhyolite.

Moore and Tomlinson of Daggett have a group of claims for which an offer of \$50,000 has been turned down.

The Beck and Wilson group has an outcrop of ore from 6 to 12 feet wide and running 3000 feet. The workings yield ore from \$11.55 to \$75 per ton.

Among the fine showings in copper are those made by Captain McLaughlin's group, with ore carrying 15 per cent red metal, and by the Peggy group, belonging to Jack Anderson, one of the Tom Boy owners, and others. On the latter there is an ore blowout 20 wide, 1400 feet long and assaying 3 1/2 per cent.

Jack Anderson and others have a group of claims with ore showing 57 per cent in lead and, in addition, high values in gold, silver and copper. Mr. Anderson will begin the sacking of lead at once.

"Shorty" Harris, locator of the first Bullfrog mine, is numbered among the most confident of the district's locators.

The district has already had its first milling, yielding in a short run a gold brick worth \$1200, the output being that of Rose and Palmer.

Another mill is being put in by the Desert King Mining company, a Los Angeles corporation which has done the most extensive development work in the district, having driven a tunnel 435 feet.

A townsite will be laid out at once adjacent to the Crackerjack company's claims, and a stage line is soon to be operated from Silver Lake station.

## GROUP OF RICH CLAIMS SOLD

A \$ 5,000 mining deal was successfully negotiated a few days ago, affecting title to the Bullion group of mining claims in the Dawson district, San Bernardino county. Charles C. Mastin of Cima selling the group to Leopold Hahn of Omaha, for the sum named.

For several weeks Hahn has been in the district with experts and made several offers for mining properties within a few miles of the Bullion group, which until a few days before the sale had not been expeted.

The result of the expert's examinations led to an offer and negotiations at once begun, were hurriedly carried to a conclusion, and as soon as Hahn had the title, he made a deed transferring the claims to the Arcalvada Mining and Milling Company of Denver, for which company he has been quietly acting.

The Bullion group and several smaller groups, affected by the deal, are accounted by the experts to be among the most promising in the new district. They are showing up well with color even in the horn, and the ledge is wide and strong, widening perceptibly at a depth of 0 feet.

Another deal, but not involving such a sum, gave A. Mackeign title to the Golden Gate group in the Bellevue district. This group was owned by Theodore Martin and J. J. Doran.

Besides these deals which indicate continued interest in the mining industry, there were filed in the County Recorder's office 59 mining locations, for claims on the border of Inyo county, the locators being Jerome Borer and M. W. Hulehan of Willow ranch. They have discovered a strong gold-bearing ledge, besides a veritable mountain of copper. Quietly all the country was located by them, and the 59 locations are evidence of their activity. These locations are all written on a fine blue paper used by R. D. Morrion, proprietor of the Willow Ranch general merchandise store. — San Bernardino Sun.

## JAPANESE ARMING

bility does not reflect American spirit. The wonder and disgust arises from the shame that there should exist among us even one such person.

It is not the part of patriotism to raise such questions. They are provocative of national ill feeling. It is no disparagement to Japan to state the obvious truth that it would be impossible for her to maintain for any long time a war with the United States. It is plain enough that, however energetic a poor nation of 48,000,000 souls may be, it is no match for a rich nation, equally energetic, of 80,000,000 souls. But such discussion is unnecessary and unwise. The game of brag between nations is a most unprofitable game. There is no possible cause of any serious national estrangement between Japan and the United States. We have the right to regulate the status of aliens in our country and Japan has the same right. However, either country may choose to exercise those rights, it is no occasion for war. At present natives of Japan have far more privileges in territory subject to the United States Government than American citizens have ever enjoyed in territory subject to Japan. So long as that remains the fact Japan has not even ground for complaint—much less war. But we shall regulate our own domestic affairs and allow Japan the same privilege. If the National Government assumes to promise Japan by treaty that which it has no authority to promise, we see no way for our government to acknowledge the fact and apologize to Japan for unintentional deception. Fortunately, thus far, no such promises have been made. Japan is getting all that was ever promised to her and there is no ground for trouble between us. — S. F. Chronicle.

## TO SHIP MILLION-DOLLAR CAR

The management of the Frances-Mohawk announces that the new 50-horse power electric engine, the cage, pump, etc., have been installed and that work would be commenced in an effort to establish a new shipping record for the lease. Heretofore this lease has been

# Local Notes

The Miner wishes all its readers a merry Thanksgiving.

Mr. Donald Craig came in from Los Angeles last Saturday.

Mrs. A. T. White, of White's Camp, left Saturday for Los Angeles.

Mr. and Mrs. T. G. Clemens will spend Thanksgiving in Riverside.

Postmaster McDivitt left last Friday for Los Angeles to spend Thanksgiving.

Mrs. Austin Young left for Los Angeles and Long Beach to spend Thanksgiving.

Don't judge a girl by her complexion. You will find that the complexion, like the girl, has its false.

Mr. Peter Miller, manager of the Rand Mercantile Company, left Saturday night for Los Angeles.

You will generally find that the girl with a skinny frame has nothing good to say in favor of the peek-a-boo waist.

Mr. Youle, who is engaged sinking a well at Goler for the Yellow Aster Company, left for San Louis Obispo to spend Thanksgiving.

Pearl Henry left for Avery, Oklahoma, his home, last Thursday. He was in the last stage of consumption, and destitute, and the employes of the Yellow Aster Company generously donated the cost of a ticket to his destination.

Randsburg is having a cold Thanksgiving. About 20 inches of snow has fallen the past week. Several inches fell last night and this morning and the weather continues threatening, with indications of more snow. Cold weather prevails and water pipes, exposed, have been frozen.

Mr. Tennyson R. Gibson arrived here Monday evening from Los Angeles. He is on a prospecting trip and is on his way to Bullfrog, Nev. He is thoroughly equipped for camp life, a large covered wagon, drawn by two trusty mules, comprising the outfit. He has been detained here the past few days on account of stormy weather, but expects to leave today. Mr. Gibson was at one time connected with the Miner, about nine years ago, and has many friends here who wish him good luck in his venture.

Randsburg is experiencing a fuel famine. There is no coal or wood to be had here or at Johannesburg. In fact there has been a scarcity of coal the past two months, and one considered himself lucky when he got more than a hundred pounds at one time. It is reported that there are over one thousand cars loaded with coal sidetracked on the Santa Fe line between here and Gallup, N. M. The road is simply swamped with freight and its present equipment is inadequate to handle the large volume of business, despite the big additions made to its rolling stock the past year. The end of the fuel famine is not in sight and the immediate prospects are not very flattering.

## HER IDEA OF DEVEILED HAM

The other day while a Randsburg grocer was telling one of his customers that he would swear on a stack of dictionaries a mile high that he never sold cheese with skippers in it, there entered the store a very small miss of about 6.

"What'll be, little girl?" asked the grocer, leaning over the counter in a patronizing manner.

"I'th furgot what it ith my mamma thent me for," she lisped, holding her head down confusedly.

"And so you can't remember it? Well, that's too bad. Let me see maybe I can help you. Wasn't sugar, was it?"

"No, thir; twathan't thugar," smiled the diminutive midget.

"Nor coffee, or tea!"

"Nope; it wath thumpthin' that comth in a can, I fink."

"In a can, hey? Was it baking powder or chocolate or spices, of some kind?" and the grocer leaned back, facing his shelves and ran his eye up and down the array of canned goods.

"Nope, I gueth it wath thun kind of meat," lisped the little maiden, after a few moments of deep thought.

"Oh, meat, hey? Now you're getting closer to it." Was it roast beef or corned beef or pickled tongue or deveiled ham or—"

"That'th it, that'th it," interrupted the child, dancing about excitedly. "Deveiled ham; I knew it wath thum kind of ham that 'h made in hell."

## BUSINESS

James L. Gordon returned Saturday night from a short visit to Los Angeles.

The new mill is rapidly going up at Atolia and 26 men are now on the payroll of that prosperous company.

John Ross, Jr., a mining man from the northern part of the State, is stopping in Randsburg for a short time.

John Lechner and son Edward are visitors in Randsburg. Mr. Lechner lived here for a long time, but in recent years Redondo has been his home.

W. F. Lay of Boston who is largely interested in the copper mines now being developed beyond Garlock has been in town for several days looking after his interests.

Rain has fallen more copiously in Randsburg this fall than ever before. On Sunday last it rained steadily and freely from early morning until long after midnight.

A good deal of assessment work is being done around Randsburg. More than usual seems to be the impression that our mines are worth taking care of and keeping up.

A great scarcity of fuel has been apparent in Randsburg as well as other parts of the State. One car of coal and one of wood, however, just arrived for Rinaldi Bros. relieves the situation some.

The city election in Los Angeles Tuesday of this week resulted in the election of Mr. Harper, Democrat, for mayor and nearly all the balance of the offices were filled from the non-partisan ticket. The labor union candidate cut but a sorry figure after all their boasting.

Coal and wood has been so scarce of late that householders had to guard what little they had closer than money. Unfortunately there are a few persons here who cannot distinguish between meum et tuum, consequently are just as apt to find their neighbors' fuel as their own.

## ADVERTISED LETTERS

The following list of letters remain uncalled for in the Randsburg Postoffice for the week ending December 5, 1906:

- Allen, L. B.
- Bauer, Frank
- Brady, George
- Brookes, W. E.
- Chalman, W. E.
- Ewing, Orman
- Fritz, Clara
- Huhl Paul
- Hanisen, L. B.
- Harnen, E.
- Tanner, Levu
- Shepard, Claude
- Smith, Mrs. Jas.
- Smith, W. E. H.

Persons claiming above will please say "advertised" and give date.

C. J. McDivitt, P. M.

Our weather has happily taken a change for the better and the last two days have been perfect.

## THE POSTMASTER'S REPORT

The following is a verbatim copy of the first report made to Postmaster-General Cortelyou by a newly-appointed postmaster in a rural district of North Carolina:

"muster Jorge Cortelyou, President of the United States, —Dear sir been required by the instrucion of the post-office to report quarterly, I now fulfil that plesent duty by reporting as follows: The harvestin has been goin on purty wel and most of the naburs have got thur cuttin about dun, wheet is hardly a averge crop on rollin lans corn is yellerish and won't cut morn ten booshils to the aker the health of the comunity is only torferable meesels and cholry hasbroken out in abought 2 and a half mile from hear, thar was a powful awaken on the subject of religion in the Potts naburhood and many soles are bein made to know thar sins forgiven.

If it doesn't, try letters.

No adulteration in bread.

ario and he expects Mrs. Illingworth here in a few days and they will try a winter in Randsburg. Mr. Illingworth was here once before, but it will be a fresh experience for Mrs. Illingworth.

J. B. Mensch and Geo. A. Mensch of Williamsport, Pa., and T. Gibson of Los Angeles, left for Beatty, Nev., last Saturday, after being detained here four days on account of stormy weather. They have two mines 25 miles southwest of Beatty, in the Funeral Range. The ore at a depth of 10 feet assays \$48 a ton. Living quarters will be erected and a hoist put in and the mines thoroughly developed. Water has to be hauled fourteen miles. Early last week the snow in Wild Rose canyon was reported 5 feet deep. Saturday night and all day Sunday one of the worst snow and rainstorms in years prevailed, and no doubt the snow in the canyon and on top of the Panamint Range was 10 feet deep when they arrived there. We guess they had a pretty tough time before they crossed the divide into Death Valley.

### BESGEN-MOORE

J. W. Besgen and Mrs. Jennie Moore were married in Los Angeles Wednesday, November 29th, and after a short visit to Mr. Besgen's mother and sister in San Bernardino returned to Randsburg. They will begin housekeeping at Atolia. Their many friends wish them a long life of happiness and prosperity.

## RUSH TO NEW COPPER FIND AT SILVER LAKE

Excitement over copper ledges in the Silver Lake region has broken out anew, rivaling anything of the kind before known in that section, says the San Bernardino Sun. The rush extends throughout the eastern section of the county, and is drawing prospectors from Inyo and Nevada.

The locations which now cause the rush were made by a professional locator. He gave his attention to outcroppings which have been passed over as worthless by hundreds of experienced prospectors, and at a depth of six feet uncovered a strong copper vein.

Within a short time, by working night and day, he succeeded in locating 22 prospects. His lantern coursing about at night attracted attention and the investigation that followed precipitated a rush, which has steadily increased.

George Hammond, who is in from there yesterday states that one prospector, who had his wife and daughter at Greenwater, and was returning with them discouraged, was caught in the rush, and giving his wife and daughter a rifle and revolver to guard the first location, he went madly along, staking out claims wherever there was an opening, regardless of the surface indications.

They bravely held to their posts all day, having nothing to eat or drink until fellow prospectors finally took compassion upon them and gave them supplies. The miners even offered to guard the claim, but fearing the husband they refused the offer, and when last seen by Hammond, they were getting ready to camp where they were.

M. T. Amos, one of the original dis-

coverers of the district, states that things are more lively than ever before, and that several good deals have been closed, eastern capital being represented among the purchasers, one of these being E. J. Raddatz, of Duluth, Minn., who, with a number of wealthy associates, has organized the Duluth-Death Valley Mining Company, and is buying up all the prospects obtainable.

The rock runs 35 per cent copper, and carries gold, silver and lead. The main contact is three miles long, and from 40 to 100 feet in width. Speaking of the prospects of the camp, Mr. Amos states that they are bright indeed. The new town of Silver Lake has a large population. There is lively bidding for lots, and business sites are bringing high values.

"Borax" Smith, who is building the Tonopah & Tidewater railroad, has given orders for the construction of a depot at Silver, which is only seven miles from the Five Point copper camp. A stage is now running regularly from the railroad to the Five Point camp and Amos Brothers' Camp, and another runs to the Crackcr Jack camp, which lies 10 miles from the Five Point mines.

All these districts lie along the rim of Death Valley and were visited by the heavy snow storm which swept the country last week, but none of the miners suffered from the weather, as they had prepared for storms, though snow is said to be most unusual there.

In the syndicate which secured the original 23 claims which have caused the present rush are J. T. Pollard, O. H. Johnson, J. E. Trueblood, W. A. Robinson, F. F. Finnigan, Frank A. Ulrich, W. W. Duncan and Will Croft.

# Local Notes

Nick Gray and his family leave for San Jose tonight.

The bazaar of the Ladies' Aid Society which was to be held next week has been postponed indefinitely.

We had another good rain Tuesday night and if they keep up we will be growing crops here on the desert.

Quite a number of men are at work doing assessment work on mines in and around Randsburg. More interest seems to be taken than usual.

Lovers of the manly art should not miss seeing the 15-round go between Ed Rogers and Ed Majors which takes place Saturday evening at O'Donnel and Harrison's.

T. T. Merithew is here in the interest of the Golden Horn Mining Company, which owns some mines about nine miles north of Randsburg on the slope facing Garlock.

## MILL AT TUNGSTEN

The machinery for the new mill at Atolia (Tungsten) is on the ground and five men are now at work putting it up. There will be five concentrators with a capacity of 15 tons daily. They will have six gas engines installed when the mill is completed, and Atolia begins to look like a town.

## REMOVAL

The Yellow Aster Company have moved their teams and blacksmith shop from Randsburg to Johannesburg. This move was made so as to be near their work at the terminus of the railroad.

## ENTOMBED MINERS ALIVE

L. B. Hicks, one of the six workmen who was buried under tons of earth at Edison, near Bakersfield, Friday last, is still alive and well, and through a two-inch pipe forced through 70 feet of debris he is in communication with the big force of rescuers that is working frantically for his release. There may be some others alive, though there is faint hope of this. Hicks informed the rescue party through the pipe Tuesday afternoon that he had talked with his companions for two hours after the cave-in Friday, but that he had heard no signals from them since. He supposes they are dead. Food and water were passed to Hicks.

The imprisoned man, through the pipe, told those on the surface that he is beneath a car in the debris. He is in the blackest darkness. He it is who answered the signals Monday, and he has heard nothing from his comrades since Friday morning.

Mr. Hardup—I've carried this letter of yours around for two weeks without mailing it.

Mrs. Hardup—Why, the idea! That was a letter asking father to lend you a hundred dollars. —Detroit Free Press.

...Tonopah road to Greenwater, Cal., and that Lawson and his associates have acquired a large majority of the capital stock of the Greenwater Red Boy and the Greenwater Saratoga Mining companies, whose properties are located in the center of the Greenwater copper mining district, adjoining the Schwab syndicate mines on the east, the John W. Gates properties on the north, the Mananza group on the west and the Dixon Wingfield Greenwater on the south.

More than \$2,000,000 in cash is said to have been paid by Lawson and his associates for the mining properties.

It is also reported that Lawson and his associates will construct a large copper smelter on the properties of the Greenwater and Red Boy companies just as soon as the machinery for same can be transported to Greenwater by rail.

The purchase of two of the richest mining properties in the Greenwater district by the most powerful copper syndicate in the United States will undoubtedly cause immediate development of the richest claims at Greenwater.--San Bernardino Index.

## NEGRO HAS STRUCK IT RICH

Enthusiastic over a new strike made by him on his claim in the Crown Point district, Tim Hawkins, a well known colored prospector, arrived at Prescott recently with two sacks of ore, in pieces of which free gold were plainly visible to the naked eye, and samples of which were assayed by a local assayer.

"I have two miners at work sinking a shaft on this kind of rock," he said, as he proudly exhibited a specimen streaked with the yellow metal. "The shaft is now 16 feet deep and the pay streak is about a foot and a half in thickness, any sample of which leaves a good streak of gold in the pan when crushed and washed.

"I located the claim about two years ago," he added, "but never thought it was a good one until about a month ago, when I discovered the rich ore sticking out of the surface of the ground. I commenced to dig right away, and it kept looking better, so I hired two miners and put them to work. I have owned lots of good property and have made it sleep, but I am not going to let

make a success in life."

"Well?"

"Well, he was right. I used that 50 cents to buy pork. Pork went up. I was honest and truthful and today I am the head drummer of a New York firm that sells 17 different kinds of fruit jams made of apple cores and peelings. Truth and honesty always work that way. They have wheels under them and can't help it."

R.M. 12-20-06

## DRIVEN OUT BY THE STORM

There was a general exodus from the Emigrant Springs country this week on account of the storm, says the Bullfrog Miner. Among those coming in were "Shorty" Harris, R. W. Earle, of Earle & Wilson, H. E. Clewell, B. Epstein and others. According to reports the snow at Skidoo, Harrisburg, and in the higher portions of the district is between three and four feet deep. As the elevation is about 6000 feet the cold was unbearable, owing to the lack of fuel and poor housings, and the residents had to seek more congenial quarters.

In the midst of the storm Bob Montgomery of the Skidoo and a party of four ladies came in by auto from Ballarat. They made the journey to within a few miles of Skidoo and had to engage teams for the rest of the trip.

The Skidoo News, the reports say, is still frozen up tight and fast, and will not be able to get out a paper until a warm breeze blows up Death Valley.

Operations at the Skidoo and other properties in the district have been practically abandoned for the time. The work on the pipe line from Telescope peak to the Skidoo also had to be shut down on account of the storm.

A telephone line to Emigrant is planned and it is understood that work is to begin in a short time.

## ADOBES THAT CONTAIN GOLD

The village of Tepetapa, near Guajuato, Mexico, is to be razed to the earth, for the adobe dwellings have been found to be more valuable for their gold content than for human habitations. The bricks were made by mixing straw with the slimes from the old Arastres
